

7th International Conference on Environmental Mutagens

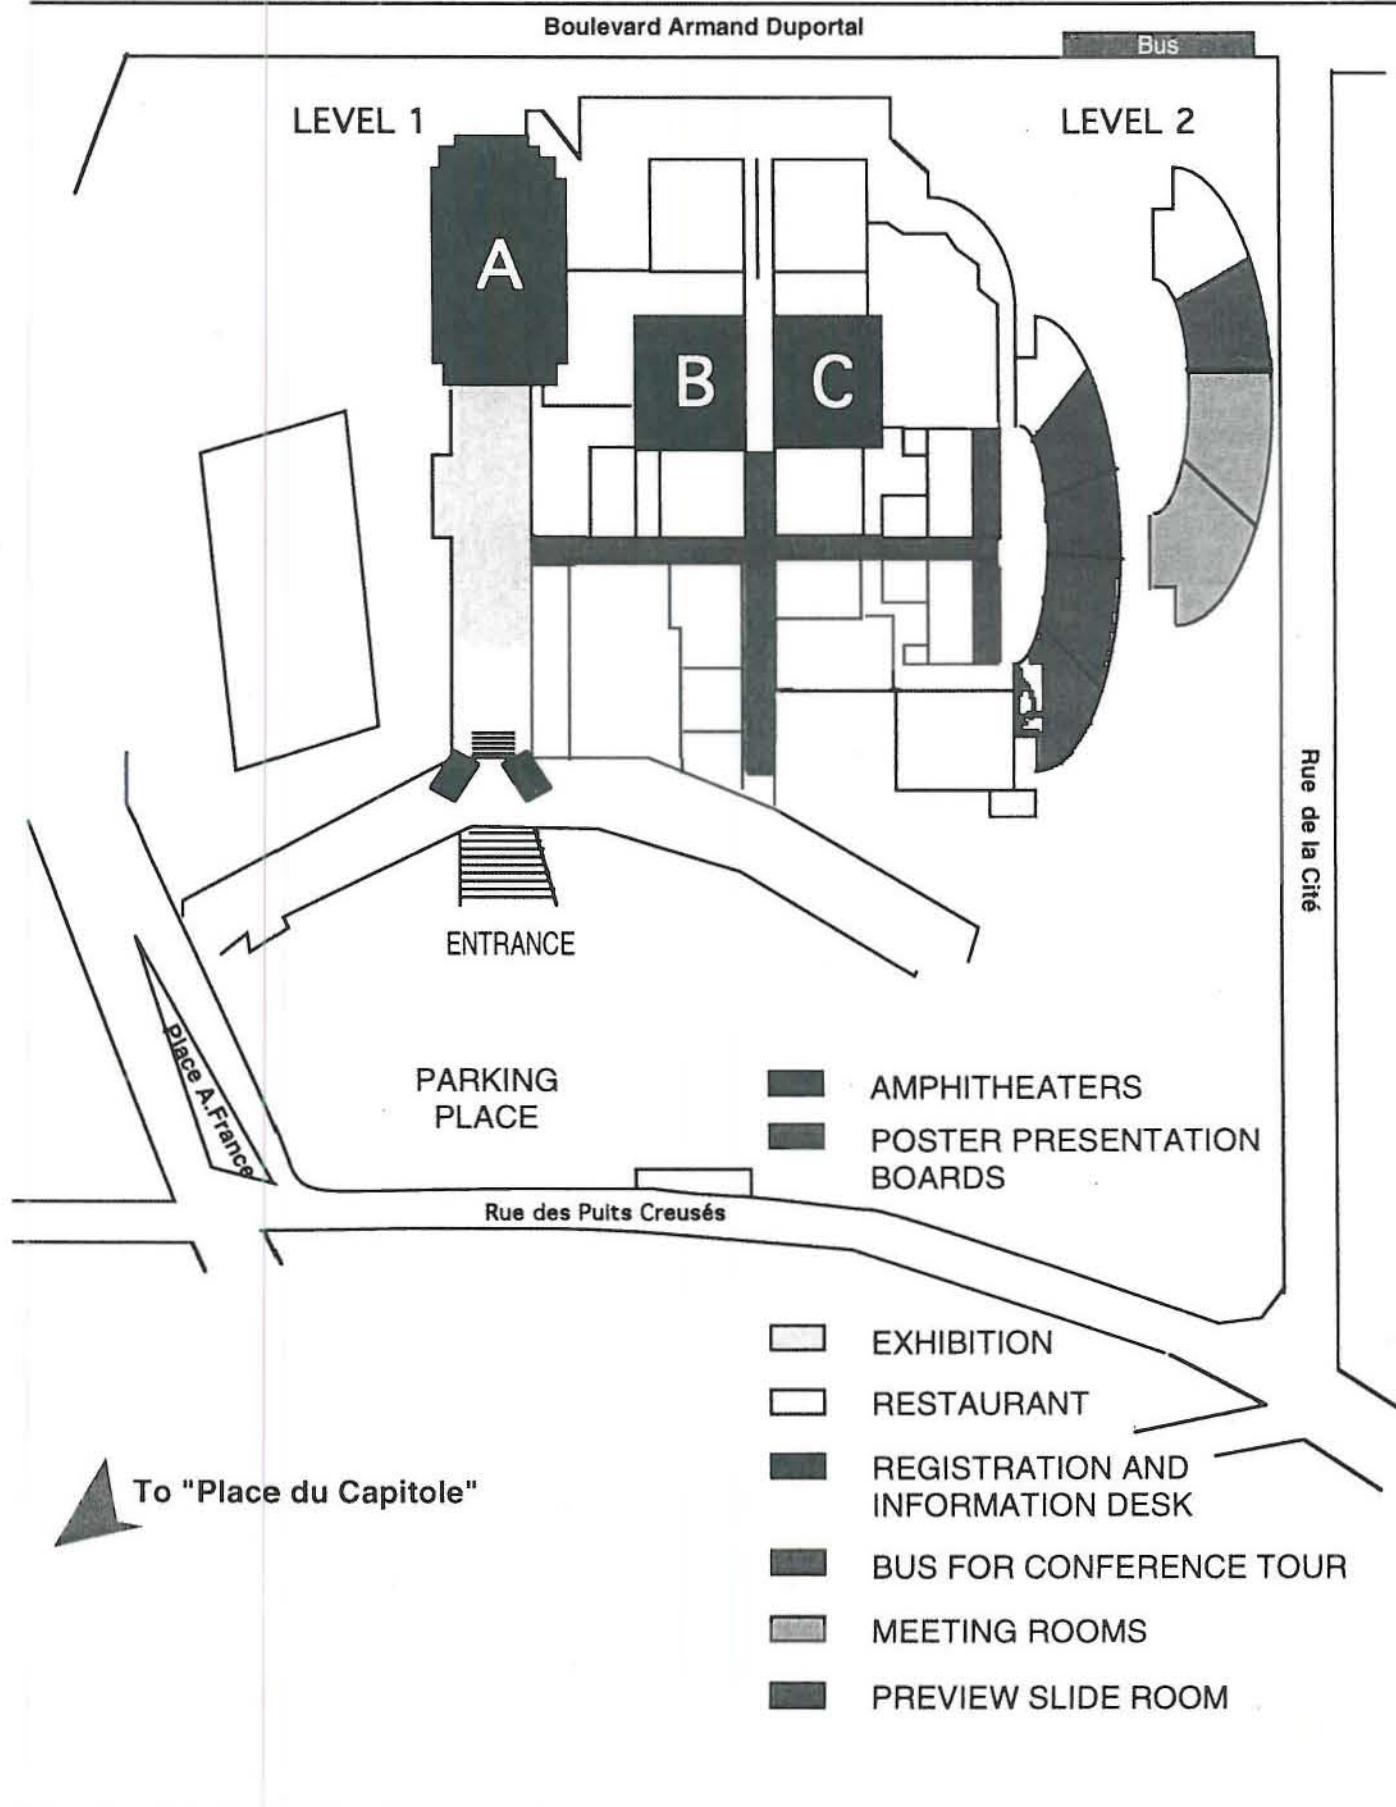

**Toulouse, France
September 7-12,
1997**

CONFERENCE VENUE

Université des Sciences Sociales
Place Anatole France - TOULOUSE

FROM THE PRESIDENTS

Message du Président
du 7è ICEM et de la
Présidente du Comité
Scientifique

Au nom de la Société Française de Toxicologie génétique, nous sommes heureux d'accueillir la 7ème Conférence Internationale sur les effets biologiques des mutagènes de l'environnement dans cette magnifique ville de Toulouse.

Durant les prochains jours, plusieurs aspects nouveaux de la recherche fondamentale seront décrits et discutés. La régulation du cycle cellulaire, la transduction du signal, la réparation de l'ADN et les voies de recombinaison sont des informations essentielles pour la compréhension des effets des mutagènes sur les cellules, les animaux, les plantes et les humains. Plusieurs mécanismes cellulaires, tels que la détection des dommages sur le DNA, la réPLICATION mutagène, les modifications des récepteurs membranaires, la transduction du signal, l'activation des protéines-kinases sont impliqués dans le fait qu'un mutagène donné peut avoir des effets délétères, ce qui à terme peut conduire à des maladies génétiques, voire à des cancers.

Cette recherche fondamentale est absolument nécessaire pour la compréhension et la mise au point de méthodes pratiques, afin de permettre l'identification des mutagènes ou des anti-mutagènes, d'évaluer leur impact sur la santé publique et de diminuer les risques d'exposition des populations par une nouvelle législation nationale ou internationale. Tous ces sujets seront développés lors de symposia et des groupes de travail mettront l'accent sur la recherche en cours et les différentes législations dans de nombreuses régions du monde.

Toulouse, la «Cité Rose» est magnifiquement située sur la Garonne, au Sud de la France, près de la Chaîne des Pyrénées. Quatrième ville française par sa taille, elle possède la deuxième plus importante Université, ce qui fait d'elle une ville jeune et vivante. Son climat très agréable vous donnera la possibilité de discussions animées entre collègues aux terrasses des cafés. Toulouse, a bien sûr, une solide réputation pour sa gastronomie et ses spécialités culinaires sont très appréciées pour diminuer le taux des maladies cardio-vasculaires ou pour accroître l'espérance de vie !

Nous vous remercions à l'avance de votre participation active au 7ème ICEM. La Science est faite par les hommes et les interactions positives entre scientifiques sont absolument nécessaires, non seulement pour produire des résultats nouveaux immédiatement applicables, mais aussi pour garder la science sur le droit chemin de l'éthique.

Ethel MOUSTACCHI
Présidente du
Comité Scientifique

Alain SARASIN
Président de la SFTG
Président du 7ème ICEM

A message from the President of the 7th ICEM and the President of the Scientific Committee

On behalf of the Société Française de Toxicologie Génétique, we extend a warm welcome to the Seventh International Conference on Environmental Mutagens in the magnificent city of Toulouse.

Over the next days, several new aspects of basic research will be described and discussed in detail. Cell cycle regulation, signal transduction, DNA repair and recombination pathways are essential information in the understanding of the effects of mutagens on cells, animals, plants and humans. Several cell mechanisms, including DNA damage detection, error-prone repair, membrane receptor modifications, signal transduction, activation of protein kinases, are involved in the way a given mutagen can have deleterious effects which can ultimately result in cancer.

This basic research is absolutely necessary to develop practical methods for the identification of mutagens or antimutagens, to assess their impact on public health and eventually to suggest reduced exposure of human populations through new international or national legislations. All these topics will be developed during several symposia and workshops actualizing current research and presentations on various legislations in different parts of the world.

Toulouse, «La Cité Rose», is beautifully located on the Garonne river in the South of France close to the Pyrénées Mountains. It is the 4th French City in size and has the second largest University making this town very young and lively. The weather is very good allowing you to enjoy exciting discussions with colleagues on open terraces. Toulouse is, of course, a reputable city for the French cuisine with a lot of specialities very useful for decreasing the rate of cardiovascular diseases or increasing life expectancy !

We thank you in advance for your active and open participation in the 7th ICEM. Science is made by people and good interactions between scientists are absolutely necessary not only to produce interesting results but also to keep science on the right ethical track.

Ethel Moustacchi
President of Scientific Committee

Alain Sarasin
President of 7th ICEM

A message from the President of the International Association of Environmental Mutagen Societies

This International Congress on Environmental Mutagens in Toulouse is of course the seventh in a series which began almost a quarter of a century ago at Asilomar, in California. Those were the heady days when the concept of mutagens as carcinogens was just beginning to be established and the future seemed as exciting as it would be straightforward. The mutagens of concern in those days were (almost) all man-made- it was still possible to refer to the human species as "man" at that time - and the solution to cancer was to get rid of (or at least control) as many environmental mutagens as possible in as short a time as possible!

The picture now is very different, although there are times when the casual observer could be forgiven for believing otherwise. But it may well have been the focus on anthropogenic chemicals in those early days which gave us the techniques with which to begin to recognise the crucial roles of natural and (perhaps especially) endogenous mutagens in the cancers of later life with which so many of us are now primarily concerned. We have also begun to learn a great deal more about processes of antimutagenesis and anticarcinogenesis, again relying very heavily on the assays and techniques developed over the first decade or so after Asilomar.

The "solution" to the cancer problem now seems a little clearer, if no less elusive. Perhaps the time has come to accept that the major problem with our diet lies not so much in the anthropogenic and/or naturally-occurring mutagens-which may or may not be there-as in the kilojoules which undoubtedly are. After all, even before Asilomar we had been firmly told how beneficial calorie restriction could be for laboratory rats..... given that many (and perhaps most) human cancers involve several quite separate mutations, can we really continue to espouse the view that a single chemically-induced mutational event is enough to cause cancer? Should we not make at least a passing reference to the fact that this is at best an oversimplification and at worst a well-intentioned misrepresentation which serves to keep us in line with the precautionary principle? Is it not time for students of environmental mutagenesis to pay a great deal more attention to the heritable genetic effects of environmental chemicals once again? If this means paying somewhat less attention to the supposed correlation between mutagens and carcinogens (as opposed to that between mutagenesis and carcinogenesis, which is a subtly different proposition), then so be it. In any event, I believe that this is an opportune time to begin refocusing our activities for the next Millennium, even those of us for whom the role of environmental mutagens in ageing and senescence will be a most pressing concern!

I look forward to meeting with you all in Toulouse.

**Donal G. MacPhee
President of IAEMS**

Welcome from the European Environmental Mutagen Society

On behalf of the European Environmental Mutagen Society (EEMS) I would like to welcome you all to the city of Toulouse which combines a historic past with the forefront of European Aviation Technology. We all hope that you will gain maximum scientific and social benefit from the 7th International Conference on Environmental Mutagens and the satellite meetings organised in Finland, Italy, Germany and the U.K. by our national sections of the EEMS. The EEMS wishes to express its congratulations to the members of the Organising Committee of the ICEM and the Société Française de Toxicologie Génétique for the efforts they have made in producing a programme which reflects the exciting developments taking place in our research area.

You are visiting at a time of major political change and the EEMS is proud of having acted as a scientific link between East and West. We hope you will all find the time to attend both our Symposium (Session XX) on «Genetic damage in the European population?» which illustrates collaborative research projects currently taking place between the former halves of our Society's membership and the Frits Sobels Award Lecture to be given by Professor G. Oliveri.

**James M. Parry
President of EEMS**

PROGRAMME

*PROGRAMME
SCIENTIFIQUE*

SUNDAY SEPTEMBER 7 1997

8.00am-7.30 pm

REGISTRATION

AMPHI A
4.30pm-5.30pm

OPENING CEREMONY

Dr. A. Sarasin / President of the 7th ICEM

Pr. P. Puel / Assistant Mayor of Toulouse

Pr. F. Amalric / Representative of the Ministry of Education and Research

Dr. C. Grillot-Courvalin / Representative of the French Ministry of Environment

Dr. J. Godet / Assistant-Director of the Biology Department of the CNRS

Pr. G. Larrouy / President of University Paul Sabatier

Dr. D. MacPhee / President of IAEMS

Dr. J. Parry / President of EEMS

5.30pm-6.00pm

Chemical safety in Europe
G. Del Bino (EC DG XII)

6.00pm-7.00pm

1996 Mutation Research Award

Pr. P.C. Hanawalt (USA)

Genomic Instability: Environmental Invasion and the Enemies Within (PL 1)

7.30pm-8.30pm

APÉRITIF

MONDAY SEPTEMBER 8 1997

8.30am-10.00am	Plenary Session
AMPHI A	Chair : G. Chu (USA) and E. Moustacchi (France)
8.30am-9.15am	Biological clocks in genetic toxicology <i>M. Radman (France) (PL 3)</i>
9.15am-10.00am	DNA damage repair syndromes in man and mouse (PL 6) <i>J. Hoeijmakers (The Netherlands)</i>
10.00am-10.30am	COFFEE BREAK
AMPHI A	Mismatch repair, replication fidelity and cancer - Session III A/B
10.30am-1.00pm	Chair : R. Von Borstel (Canada) and J. S. Hoffmann (France)
A) Spontaneous mutations in non-dividing and in dividing cells	Recombination-dependent stationary-phase mutation : a model for mutagenesis in non-dividing cells (O III A.3) <i>S. M. Rosenberg (Canada)</i>
11.00am-11.30am	Creation of new mutant DNA repair enzymes (O III A.1) <i>L. A. Loeb (USA)</i>
B) Mechanism of mismatch repair	Biochemistry of postreplicative mismatch repair in human cells (O III B.1) <i>J. Jiricny (Switzerland)</i>
11.30am-12.00pm	DNA mismatch repair defects in drug resistance (O III B.2) <i>P. Karran (UK)</i>
12.00pm-12.30pm	Evolution, cancer and misguided fidelity (O III C.3) <i>D. MacPhee (Australia)</i>
AMPHI B	Structure - activity relationship in carcinogenesis and mutagenesis : What is their true role and value ? - Session II
10.30am-1.00pm	Chair : L. Ferguson (N. Zealand) and B. Molinier (France)
10.30am-11.00am	When and how should we perform QSAR analyses ? (O II.2) <i>R. Benigni (Italy)</i>
11.00am-11.30am	SAR in predictive toxicology : reality, distant goal or adjunct ? (O II.1) <i>H. S. Rosenkranz (USA)</i>
11.30am-12.00pm	TOPKAT 5.0 and modulation of toxicity (O II.3) <i>K. Enslein (USA)</i>
12.00pm-12.30pm	Using SAR in an integrated approach to carcinogenic risk assessment (O II.5) <i>J. J. Langowski (UK)</i>
12.30pm-1.00pm	Inextricable linkage of an SAR to a single mechanism of carcinogenicity or mutagenicity : Curse or blessing ? (O II. 4) <i>A. M. Richard (USA)</i>
AMPHI C	Regulations update and industrial views - Session XIX A
	Chair : D. Casciano (USA) and V. Thybaud (France)
10.30am-1.00pm	A) Genotoxicity guidelines and harmonization : what's new ?
10.30am-10.45am	ICH harmonisation of genotoxicity testing for pharmaceuticals; consequences for industry and regulatory bodies (O XIX A.1) <i>L. Müller (Germany)</i>
10.45am-11.00am	The problem of <i>in vivo</i> specific mutagens real or imaginary ? (O XIX A.1) <i>D. Tweats (UK)</i>
11.00am-11.15am	Report of an international collaborative study of the mouse lymphoma assay using the microwell method (O XIX A.3 b) <i>T. Sofuni (Japan)</i>
11.15am-11.30am	Novel pharmaceutical / chemical structures and the need for more extensive genotoxicity testing (O XIX A.1) <i>L. Schechtman (USA)</i>
11.30am-11.45am	Discussion
11.45am-12.00pm	New OECD genotoxicity guidelines : A critical review in relation to other international guidelines (O XIX A.5) <i>D. Kirkland (UK)</i>
12.00pm-12.15pm	Regulatory issues in the aftermath of international harmonization of mutagenicity test guidelines (O XIX A.7) <i>D. H. Blakey (Canada)</i>

12.15pm-12.30pm	Interpretation of regulatory guidelines : An industrial view (O XIX A.6) <i>L. Henderson (UK)</i>
12.30pm-12.45pm	Unresolved problems in guidelines for mutagenesis (O XIX A.8) <i>D. Marzin (France)</i>
12.45pm-1.00pm	Discussion
12.30pm-2.00pm	MEAL
AMPHI A 2.00pm-3.30pm	Mismatch repair, replication fidelity and cancer - Session III C Chair : E. Chu (USA) and J. Laval (France)
2.00pm-2.30pm	C) Cancer predisposition Mutations in HNPCC (O III C.1) <i>L.A. Aaltonen (Finland)</i>
2.30pm-3.00pm	Spontaneous mutation in colon cancer cells (O III A.2) <i>M. Meuth (USA)</i>
3.00pm-3.30pm	Early and late clonal genomic alterations in cancer cells (O III C.2) <i>B. Dutrillaux (France)</i>
AMPHI B 2.00pm-3.30pm	WORKSHOP : Session XXIII Impact of environmental mutagens on genetic biodiversity Chair : Shabeg S. Sandhu (USA) and P. Gauduchon (France)
2.00pm-2.30pm	Introduction and scope of session <i>S. Sandhu (USA)</i>
2.30pm-3.00pm	Unnatural selection : genetic and evolutionary consequences of environmental pollution <i>J. Bickham (USA)</i>
3.00pm-3.30pm	Genomic instability in response to environmental stressors <i>R. S. Athwal (USA)</i>
AMPHI C 2.00pm-3.30pm	Transgenic model for studying environmental mutagenesis - Session XV A Chair : J. Van Delft (The Netherlands) and R. Forster (France)
2.00pm-2.30pm	A) Use for mutagenesis studies The use of transgenic animals carrying the <i>E. coli lacI</i> gene in understanding mutagenesis and carcinogenesis (O XV A.1) <i>B. W. Glickman (Canada)</i>
2.30pm-3.00pm	A proposal for the use of <i>in vivo</i> mutation assays in cancer assessments (O XV A.2) <i>N. J. Gorelick (USA)</i>
3.00pm-3.30pm	Validation and strategic use of <i>in vivo</i> transgenic gene mutation assays (O XV A.3) <i>S. Dean (UK)</i>
3.30pm-5.00pm	POSTER PRESENTATIONS (Sessions II-III-XV-XIX-XXI) and COFFEE BREAK
AMPHI A 5.00pm-7.00pm	WORKSHOP : Session XXI SOS Chromotest Chair : M. Hofnung (France) and R. Devoret (France)
5.00pm-5.15pm	Contribution of the SOS chromotest to genetic toxicology (O XXI.1) <i>P. Quillardet (France)</i>
5.15pm-5.30pm	SAR models of the SOS chromotest : Mechanistic implications (O XXI.2) <i>H. S. Rosenkranz (USA)</i>
5.30pm-5.45pm	Investigating the sources and fate of genotoxic substances in aquatic systems with the SOS chromotest (O XXI.3) <i>P. A. White (USA)</i>
5.45pm-6.00pm	Use of the SOS chromotest to study the genotoxic activity of several organohalogenated compounds found in drinking water (O XXI.4) <i>F. Le Curieux (France)</i>
6.00pm-6.15pm	The SOS chromotest for basic genetics (O XXI.5) <i>S. V. Vasilieva (Russian Federation)</i>
6.15pm-6.30pm	A comparison between the SOS chromotest and the <i>Salmonella</i> TA100 Ames test (O XXI.6) <i>E. Eder (Germany)</i>
6.30pm-7.00pm	Discussion

AMPHI B	WORKSHOP : Session XXIII (following)
5.00pm-6.30pm	Impact of environmental mutagens on genetic biodiversity Chair : Shabeg S. Sandhu (USA) and P. Gauduchon (France)
5.00pm-5.30pm	Monitoring mutagenesis in natural populations <i>P. Hebert (Canada)</i>
5.30pm-6.00pm	Measures of genetic diversity and influence of bottlenecks <i>L. Chikhi (Italy)</i>
6.00pm-6.30pm	Discussion
AMPHI C	Transgenic model for studying environmental mutagenesis - Session XV B
5.00pm-6.00pm	Chair : J. Van Delft (The Netherlands) and R. Forster (France)
5.00pm-5.30pm	B) Use for fundamental carcinogenesis mechanisms Transgenic mouse models as tools to define specific chemical-gene interactions (O XV B.1) <i>R. Tennant (USA)</i>
5.30pm-6.00pm	Nucleotide excision repair-defects and mutations in the <i>XPA</i> - deficient mice (O XV B.2) <i>K. Tanaka (Japan)</i>
AMPHI C	General Assembly IAEMS
6.00pm-7.00pm	

POSTER PRESENTATIONS

Sessions II, III, XV, XIX, XXI

SESSION II: STRUCTURE-ACTIVITY RELATIONSHIP IN CARCINOGENESIS AND MUTAGENESIS: WHAT IS THEIR TRUE ROLE AND VALUE?

- P II.1 Flavonoids, oxygen radicals and chromosomal aberrations in V79 cells: A structure activity study
Jorge Gaspar, Isabel Duarte Silva, Gonçalo Gomes da Costa, Antonio Rodrigues, Antonio Laires and José Rueff
- P II.2 Preliminary data for a study on the relationship between structure and genotoxicity of progestins
Giovanni Brambilla and Antonietta Martelli
- P II.3 Phenols, oxygen radicals and genotoxicity
Jorge Gaspar, Daniela Leão, Maria Paula Duarte, Antonio Laires, José Santos Oliveira and José Rueff
- P II.4 Theoretical background of the relationships structure-genotoxicity for rodents and bacteria in the series of short-chain halogenated hydrocarbons and alcohols
Nina Kharchevnikova, Zoya Zholdakova and Vyacheslav Zhurkov
- P II.5 Generation of structure-activity relationship (SAR) data from standard Ames screening assays
Patricia Lafouge and J.-Albert Vericat
- P II.6 Inextricable linkage of an SAR to a single mechanism of carcinogenicity or mutage
Ann M. Richard
- P II.7 Formation of nitrated aromatic compounds from benzene and peroxynitrite, a possible mechanism of benzene genotoxicity
Jingsheng Tuo, Simon P Wolff, steffen Loft and Henrik E. Poulsen
- P II.8 Genetic activity profiles (GAP) for windows
H.F. Stack, M.A. Jackson, P.H.M. Lohman, W.J.A. Lohman and M.D. Waters

SESSION III: MISMATCH REPAIR, REPLICATION FIDELITY AND CANCER

- A. Spontaneous mutations in non-dividing and in dividing cells
- P III A.1 Antimutagenic effects of catabolite-repressing sugars in UV irradiated cells of Escherichia coli
Mark Ambrose and Donald MacPhee
- P III A.2 MNNG tolerance is not an inevitable phenotype of the hMSH2 deficient cell
Qian Ying, Yingnian Yu, Xingruo Chen, Jianhong Luo and Haiyang Xie
- P III A.3 CHO mutant cell lines lacking nucleotide excision repair and mismatch repair
Ken-ichiro Nara, Fumio Nagashima, Masashi Takao and Akira Yasui
- P III A.4 Effect of mismatch repair on UV- and MMS- mutagenesis of λ susO8 phage induced under conditions permissive and nonpermissive for phage DNA replication
Irena Pietryzkowska and Anna Czajkowska
- P III A.5 Analysis of the background hprt mutant frequency and microsatellite mutations in healthy young adults
Margaret Davies, Joanne Turner and Paul Rumsby
- P III A.6 Resistance to 6-thioguanine in mismatch repair-deficient human cancer cell lines correlates with an increase in mutations at the HPRT locus
Warren E. Glaab and Kenneth R. Tindall

P III A.7	Sensitivity to CCNU in methylation tolerant mismatch repair defective human cells <i>Gabriele Aquilina, Sabrina Ceccotti, Simone Martinelli, Richard Hampson and Margherita Bignami</i>
P III A.8	Increased somatic recombination in methylation tolerant human cells with defective mismatch repair <i>Carmela Ciotta, Sabrina Ceccotti, Gabriele Aquilina, Fabio Palombo, Josef Jiricny, Odile Humbert and Margherita Bignami</i>
P III A.9	Influence of nuclear DNA polymerases and MSH3 gene on adaptive mutations in yeast <i>Saccharomyces cerevisiae</i> <i>Agnieszka Halas, Hanna Baranowska, Zofia Policinska and Witold Jachymczyk</i>
P III A.10	Conditions for the study of mutations in non-dividing cells of <i>Saccharomyces cerevisiae</i> <i>Erich Heidenreich and Ulrike Wintersberger</i>
P III A.11	Bypass synthesis of site-specific benzo[<i>a</i>]pyrene diol epoxide-adducted template DNA by T7 RNA polymerase <i>Kathryn Martin Remington, Samuel E. Bennett, Constance M. Harris, Thomas M. Harris, and Katarzyna Bebenek</i>
B. Mechanism of mismatch repair	
P III B.1	Replication of damaged DNA in <i>Saccharomyces cerevisiae</i> <i>Kathy Baynton, Anne Bresson-Roy and Robert P.P. Fuchs</i>
P III B.2	PCNA is required in mismatch repair at a step preceding DNA synthesis <i>Asad Umar, Andrew B. Buermeyer, Jeffrey A. Simon, David C. Thomas, Alan Clark, R. Michael Liskay and Thomas A. Kunkel</i>
P III B.3	The asymmetry of mutagenesis during replication of leading and lagging DNA strand in <i>E. coli</i> chromosome <i>Iwona J. Fijalkowska, Piotr Jonczyk, Magdalena Maliszewska-Tkaczek, Małgorzata Podsiadla, Damian Gaweł and Roel M. Schaaper</i>
P III B.4	Specific protein-protein interactions between <i>E. coli</i> DNA replication proteins <i>Piotr Jonczyk, Adrianna Nowicka and Iwona J. Fijalkowska</i>
P III B.5	Activation of the proto-oncogene HRAS by DNA polymerase β mediated translesion synthesis <i>Mathilde Fréchet, Corinne Cayrol, Christophe Cazaux, Nicolas Tanguy le Gac, Giuseppe Villani, Bernard Ducommun and Jean-Sébastien Hoffmann</i>
P III B.6	Complementation of the xeroderma pigmentosum-variant defect in thymine dimer replication <i>in vitro</i> <i>Daniel L. Svoboda</i>
P III B.7	Isolation and characterization of a novel mutator strain of <i>Escherichia coli</i> that generates GC-to-CG transversions <i>Shuji Yonei, Naoko Ishikawa and Qiu-Mei Zhang</i>
P III B.8	Lowering of DNA replication fidelity is the chief mechanism of MNNG induced genetic instability characterized by non-targeted mutagenesis in mammalian cells <i>Zhaohui Feng, Xuemin Sun, Yingnian Yu and Xingruo Chen</i>
P III B.9	Effect of the major cisplatin DNA adduct on the activities of the herpes simplex virus type-1 helicase-primase <i>Nicolas Tanguy Le Gac, Paul E. Boehmer, Jean-Sébastien Hoffmann and Giuseppe Villani</i>

P III B.10	<p>Identification and characterization of exo/endonucleases involved in mutation avoidance in <i>S. cerevisiae</i> <i>Daniel X. Tishkoff, Pascale Bertrand, Adrienne Boerger, Nicole Filosi, Gretchen M. Gaida and Richard D. Kolodner</i></p> <p>C. Cancer predisposition</p>
P III C.1	<p>Genetic predisposition, induction of chromosome aberrations and development of cancer <i>William W. Au</i></p>
P III C.2	<p>DNA mismatch binding defects in human lung tumor cell lines <i>Shanbeh Zienoldiny, David Ryberg, Adi F. Gazdar and Aage Haugen</i></p>
P III C.3	<p>Cytogenetic analysis of the effect of p53 mutation on chromosome stability in an in vitro human thyroid cancer cell model system <i>Elizabeth M. Parry and Hakan Ulucan</i></p>
P III C.4	<p>Exploring through mutation spectra studies the model of information erasing as a cause of cancer <i>Primavara Grigoriu de Buendia</i></p>
P III C.5	<p>Identification of a cell senescence gene on human chromosome 6q16.3 by functional complementation of immortal cell lines <i>A.K. Sandhu, N. Rane, G.P. Kaur, J.K. deRiel and R.S. Athwal</i></p>
P III C.6	<p>A positive selection assay for genomic instability <i>Aimee L. Jackson and Lawrence A. Loeb</i></p>
SESSION XV: TRANSGENIC MODEL FOR STUDYING ENVIRONMENTAL MUTAGENESIS	
	<p>A. Use for mutagenesis studies</p>
P XV.1	<p>Mutant frequencies and mutation spectra of <i>lacI</i> and lambda <i>cII</i> gene in Big BlueTM Mice treated with dimethylnitrosamine <i>Xue Wang, Takayoshi Suzuki, Toshiaki Itoh, Makoto Hayashi and Toshio Sofuni</i></p>
P XV.2	<p>Collaborative study on the transgenic mutation assay by JEMS/MMS <i>Takayoshi Suzuki</i></p>
P XV.3	<p>The DNA damaging antiandrogen cyproterone acetate is mutagenic in the liver of transgenic Big Blue rats <i>Ottheinz Krebs, Jack Favor, Bettina Schäfer and Thomas Wolff</i></p>
P XV.4	<p>4-Chloro-o-phenylenediamine a 26-week oral (in feed) mutagenicity study in Big BlueTM mice <i>Willi Suter, Frank Staedtler, Franziska Locher, Tracey Swingler and Laura Wilson</i></p>
P XV.5	<p>Increase in the frequency of LacI mutants accompanies development of hepatitis in the livers of LEC rats <i>Hideko Sone, Ying Jie Li, Minako Nagao and Yasunobu Aoki</i></p>
P XV.6	<p>The spectrum of spontaneous mutation in the Big BlueTM <i>lacI</i> transgene: Evidence compatible with A+T mutation pressure on a high G+C content transgene <i>Steve S. Sommer, Victoria L. Buettner, Kathleen A. Hill and Hiroshi Nishino</i></p>
P XV.7	<p>In vivo and in vitro mutagenicity and mutational spectrum of epoxybutene and diepoxybutane to assess their roles in the in vivo mutagenicity of 1,3-butadiene <i>Leslie Recio, Rogene Henderson, Kathy Meyer, Linda Pluta, Christopher J. Saranko and Ann-Marie Steen</i></p>

P XV.8	In vivo mutagenicity of 2-amino-3,8-dimethylimidazo[4,5-f]quinoxaline (MeIQX) in lacI transgenic mice <i>Toshiaki Itoh, Takayoshi Suzuki, Xue Wang, Makoto Hayashi, Akiyoshi Nishikawa, Shinichiro Ikezaki, Fumio Furukawa, Michihito Takahashi and Toshio Sofuni</i>
P XV.9	Dimethylnitrosamine and chloroform induced mutagenic profiles in lacI transgenic B6C3F1 mice over 180 days <i>Byron Butterworth, Catherine Sprankle, Michael Templin, Alex Constan, Douglas Wolf, Linda Pluta, Brian Wong and Leslie Recio</i>
P XV.10	Quantitative and molecular analysis of DMBA-induced mutations in the model BlueRat TM : Comparison of mutagenesis in the transgene <i>lacI</i> with the endogenous gene <i>hprt</i> <i>Daniel A. Casciano, Robert H. Heflich, Anane Aidoo and Mugimane G. Manjanatha</i>
P XV.11	Dose dependent change in the mutation spectrum of the <i>lacI</i> transgene isolated from Big Blue TM mice subchronically treated with 4-chloro-o-phenylenediamine <i>Jaime Crespo-Perez, Franziska Locher, Tracey Swingler, Laura Wilson, Sandra Steiner, Willi Suter and Frank Staedtler</i>
P XV.12	Detection of quinoline-induced mutation in the lacZ transgenic mouse <i>Yuko Miyata, Ken-ichi Saeki, Yutaka Kawazoe, Takayoshi Suzuki, Makoto Hayashi and Toshio Sofuni</i>
P XV.13	Role of DNA-adduct formation and cell proliferation in the induction of gene mutations by 5,9-dimethyl-dibenzocarbazole in Muta TM Mouse liver <i>Françoise Tombolan, Dominique Brault, Dominique Renault, François Périn, Odette Périn-Roussel, Danièle Taras and Véronique Thybaud</i>
P XV.14	Testing chemicals in Muta TM Mouse system <i>Mihaly Szegedi, Stephen W. Dean and Ildiko Csapkai</i>
P XV.15	Tissue-specific mutagenicity of 7H-dibenzo[c,g]carbazole and two derivatives in Muta TM Mouse following topical application <i>Dominique Renault, Dominique Brault, Françoise Tombolan, François Périn and Véronique Thybaud</i>
P XV.16	Genotoxicity of methylating agents in transgenic mice <i>V. Pletsas, V.L. Souliotis, M.J. Steenwinkel, J.H.M. van Delft, R.A. Baan and S.A. Kyrtopoulos</i>
P XV.17	Kinetics of detection of β -propiolactone and N-N'-nitro-N-nitrosoguanidine genotoxic effects in mouse gastric mucosa using single gel cell electrophoresis assay and Muta TM mouse assay <i>Dominique Brault, Dominique Renault, Françoise Tombolan and Véronique Thybaud</i>
	B. Use for fundamental carcinogenesis mechanisms
P XV.18	Development of transgenic mouse mutation test model containing XYLE target gene <i>Mu-Quan Yin, Jian Huang, Yao-Fu Chen, Jian-Quan Chen, Guo-Xiang Cheng, Shao-Fu Xu, Jerry L. Hsueh and Xin-Fang Qiu</i>
P XV.19	Environmental carcinogen (DMBA) acts synergistically in int-5/aromatase transgenic mice that have increased mammary estrogen activity <i>Nagalakshmi Keshava, C. Fang, Kapil N. Bhalla and Rajeshwar Rao Tekmal</i>
P XV.20	Toxic and mutagenic effects of 2-amino-1-methyl-6-phenylimidazo-[4,5-b]-pyridine (PhIP) in XPA deficient mice <i>Johanna Klein, Edwin Zwart, Coen van Kreijl and Harry van Steeg</i>

P XV.21	The origin of spontaneous mutations in the PHIX174 AM3, CS70 transgenic system <i>Heinrich V. Malling and Robert P. Weaver</i>
P XV.22	New transgenic mouse gpt-delta for the efficient detection of point mutations and deletions in vivo <i>Takehiko Nohmi, Hiroshi Suzuki, Motoe Katoh, Ken-ichi Masumura, Makoto Suzuki, Keiko Matsui, Michiko Matsui, Masami Yamada, Masahiko Watanabe, Naoko Horiya, Otoya Ueda, Tohru Shibuya, Hideo Ikeda and Toshio Sofuni</i>
P XV.23	Gene mutation assays in LacZ transgenic mice: Comparison of LacZ with endogenous genes in splenocytes and small intestine epithelial cells <i>Joost van Delft, Angela Bergmans, Fred van Dam, Ad Tates, Louise Howard, Douglas Winton and Robert Baan</i>
P XV.24	Induction of somatic intrachromosomal recombination inversion events by cyclophosphamide in a transgenic mouse model <i>Pamela J. Sykes, Antony M. Hooker, Carolyn S. Harrington, Andrew K. Jacobs, Linda Kingsbury and Alexander A. Morley</i>
P XV.25	Compared with control mice, MSH2 ⁻ but not MSH2 ⁺ LacI transgenic mice demonstrate elevated mutation frequencies in response to MNU <i>Susan E. Andrew, Margaret McKinnon, Benjamin Chang, Agnes Francis, Janice Penney and Frank R. Jirik</i>
P XV.26	Venezuela encephalomyelitis of horses virus (VEE) capable to cause cytogenetic infringements in tumor cells <i>Evgeniy Rogozin, Ludmila Urazova and Nicolai Ilyinskikh</i>
SESSION XIX: REGULATION UPDATE AND INDUSTRIAL VIEWS	
P XIX.1	Prediction of rodent carcinogenicity by using a battery of in vitro and in vivo mutation tests <i>Byung-Soo Kim and Barry H. Margolin</i>
P XIX.2	The mouse lymphoma TK assay (MLA): experiences with continuous (24 hour) treatment incubation <i>Julie Clements, Michael Fellows, Joanne Wilkinson, Lesley Reeve, Matthew Hayes, Dianne Middleton and Rebecca Plaxton</i>
P XIX.3	Species specificity in the bone marrow micronucleus assay <i>Barry Elliott, Kath Griffiths, James Mackay and Julie Wade</i>
P XIX.4	The influence of duration and number of cell cycles after mutagenic exposure on SCE rate <i>Sergey Stukalov and Sergey Kuzin</i>
P XIX.5	Cytotoxic and morphological transforming effects of refractory ceramic fibers in syrian hamster embryo (SHE) cells <i>Zoé Elias, Odile Poirot, Marie-Céleste Danière, Francine Terzetti and Anne Marie Marande</i>
P XIX.6	Urethane and phenobarbital are not mutagenic to L5178Y TK +/- cells without S9 following standard and extended treatment times <i>Philip Clay, Chris Williams, James Mackay and Barry Elliott</i>
P XIX.7	Micronucleus (MN) frequency in nasal respiratory epithelium cells from young adults living in urban areas with different levels of air pollution <i>M.E. Gonsebatt, M. del Valle, T. Fortoul, D. Pinto, J.M. Ceballos and G. Garcia</i>
P XIX.8	Development and validation of rat micronucleus (MN) analysis using flow cytometer: A comparison with manual method <i>G. Krishna, K. Criswell, D. Zielinski, G. Urda and J. Theiss</i>

P XIX.9	Migration and mutagenic potentiality of food contact materials: A new strategy for testing their safety <i>Isabelle Leguy, Anne-Marie Le Bon, Christine Belloir, Jean-Claude Lhuignot and Marie-Christine Chagnon</i>
P XIX.10	Analytical methods of toxic and genotoxic evaluation to the control of environmental quality <i>Vera Vargas, Clarice Lemos, Iara Martins, Beatriz Troviscal, M. Luiza Gatto, M. Helena Stringuini, M. Lucia Rodrigues, Rubem Horn, Inara Pedrotti, João Santos, Ana Mittelstaedt, Irascema Azevedo, Patricia Rödel, Isabel Ferreira and Nara Terra</i>
P XIX.11	Revising the UKEMS statistics guidelines for the new millennium <i>David P. Lovell and Michael H.L. Green</i>
P XIX.12	The mouse lymphoma assay - universal catchall? <i>Martha M. Moore and Jane Cole</i>
P XIX.13	Hygiene classification of pesticides mutagenicity <i>Julia Revazova and Vaycheslav Shurkov</i>
P XIX.14	Categorization of pesticides according to their carcinogenic hazard to humans <i>Vladimir Turusov and Valery Rakitsky</i>
P XIX.15	Morphological transformation and inhibition of intercellular communication of Syrian hamster embryo cells by hepatic peroxisome proliferators <i>Véronique Cruciani, Claudine Rast, Marie-José Durand, Stéphanie Alexandre, Giao Nguyen-Ba and Paule Vasseur</i>
P XIX.16	Chemical hygiene: a necessary condition for the prevention of cancer <i>Nik van Larebeke, Joris Derman and Irena Tallon</i>
SESSION XXI: WORKSHOP ON SOS CHROMOTEST	
P XXI.1	SOS chromotest strains with specific genetic markers for the determination of genotoxic mechanisms <i>Erwin Eder and Christoph Deininger</i>
P XXI.2	SOS chromotest results in a broader context II: Empirical relationships between SOS genotoxicity and several in vivo mutagenicity end-points <i>Paul A. White</i>
P XXI.3	Applicability of the <i>Salmonella sulA</i> -test to detect complex environmental mixtures <i>Michel De Méo, Mohammed El Mzibri, Michèle Laget, Hélène Guiraud and Gérard Duménil</i>
P XXI.4	Evaluation of the <i>Salmonella sulA</i> -test for the detection of genotoxins <i>Mohammed El Mzibri, Michel De Méo, Michèle Laget, Hélène Guiraud and Gérard Duménil</i>
P XXI.5	Mutations and processes repair; control of some genetic characters of <i>E. coli PQ37</i> strain <i>Sabrina Ait Ahmed and Soumaya Chellali</i>
P XXI.6	Screening for genotoxicity with SOS chromotest <i>R. Vachkova-Petrova and E. Tyagunenko</i>
P XXI.7	The SOS chromotest: An analysis from published data on 950 chemicals <i>P. Quillardet, E. Touati and M. Hofnung</i>
P XXI.8	Inhibition of SOS response in <i>E. coli PQ37</i> by heated turmeric and curcumin <i>Kalpagam Polasa, A. Nadamuni Naidu and R. Krishnaswamy</i>

- P XXI.9 The SOS inducing potency of four textile dyes
R. C. Sobi, Meenu Kaushal and P. Quillardet
- P XXI.10 A study on the mutagenic effects of some plant growth hormones by salmonella/microsome and
SOS chromotest systems
öksuzoglu Emine, Diril Nuran and Durusoy Mubecel
- P XXI.11 The SOS lux test for the detection of genotoxic agents
Petra Rettberg, Leonid R. Ptitsyn, Olga Komova, Stanislav Kozubek, Eugene Krasavin, Marin Bonev and Gerda Horneck

TUESDAY SEPTEMBER 9 1997

8.30am-10.00am	Plenary Session Chair : J. Gentile (USA) and B. Dutrillaux (France)
8.30am-9.15am	Chromosome aberrations induced by genotoxins (PL 7) <i>A. T. Natarajan (The Netherlands)</i>
9.15am-10.00am	Ataxia - telangiectasia and the ATM protein : DNA damage and more (PL 10) <i>Y. Shiloh (Israel)</i>
10.00am-10.30am	COFFEE BREAK
AMPHI A	Chromatin and DNA repair - Session VI Chair : A. Van Zeeland (The Netherlands) and G. Almouzni (France)
10.30am-12.30pm	Imaging sites where damaged DNA is repaired, and their relationship to transcription factories (O VI.1) <i>P. R. Cook (UK)</i>
10.30am-11.00am	Differential repair of structurally related alkylation lesions in specific genes : influence on the risk of mutation and malignant conversion <i>M. F. Rajewsky (Germany)</i>
11.00am-11.30am	Regulation of gene repair and transcription in normal human cells, and in premature aging syndromes (O VI.3) <i>V. A. Bohr (USA)</i>
11.30am-12.00pm	DNA methylation and gene expression in normal and tumour cells <i>R. Holliday (Australia)</i>
AMPHI B	Ionizing radiation and mechanisms of genetic instability - Session X Chair : M. Zdzienicka (The Netherlands) and D. Averbeck (France)
10.30am-1.00pm	Radiation-induced genomic instability : delayed mutagenic and cytogenetic effects (O X.1) <i>J. B. Little (USA)</i>
10.30am-11.00am	Radiation-induced genomic instability in haemopoietic cells (O X.3) <i>E. G. Wright (UK)</i>
11.00am-11.30am	Chromosomal instability in human lymphocytes after low dose rate gamma-irradiation and delayed mitogen stimulation (O X.4) <i>B. Lambert (Sweden)</i>
11.30am-12.00pm	Chromosomal instability and telomere length (O X.2) <i>L. Sabatier (France)</i>
12.00pm-12.30pm	The role of telomeres in genetic instability (O X.5) <i>J. P. Murnane (USA)</i>
AMPHI C	Regulations update and industrial views - Session XIX B/C Chair : B. Elliott (UK) and D. Marzin (France)
10.30am-1.00pm	B) From fundamental research to regulatory guidelines
10.30am-1.00pm	Mechanistic research in interpretation of <i>in vitro</i> genotoxicity (O XIX B.1) <i>S. Galloway (USA)</i>
10.30am-10.50am	How new <i>in vivo</i> assays will help in the assessment of genotoxicity risk (O XIX B.3) <i>V. Thybaud (France)</i>
10.50am-11.10am	Translating new technologies into new regulatory guidelines for risk assessment (O XIX B.4) <i>R. Elespuru (USA)</i>
11.10am-11.30am	Forward feeding : from research to policy in the Commission <i>C. Nolan (EC/Belgium)</i>
11.30am-11.50am	C) Alternative tests for carcinogenesis
11.50am-12.10pm	Moving away from a two species requirement for carcinogenicity studies : A regulatory perspective (O XIX C.1) <i>J. W. van der Laan (The Netherlands)</i>
12.10pm-12.30pm	Cell transformation in Syrian Hamster Embryo (SHE) cells : A biologically relevant and predictive method for assessing carcinogenic potential (O XIX C.2) <i>R. LeBoeuf (USA)</i>
12.30pm-12.50pm	Use of transgenic bioassays to distinguish carcinogens and noncarcinogens <i>R. Tennant (USA)</i>

12.30pm-2.00pm	MEAL
AMPHI A	Nucleotide excision repair and transcription - Session V A Chair : G. Holmquist (USA) and F. Larminat (France)
2.00pm-3.30pm	A) Molecular mechanisms Nucleotide excision repair mechanism in human cells : analysis by <i>in vitro</i> assays (O V A.1) <i>B. Salles (France)</i>
2.00pm-2.30pm	Cellular responses to transcription arrest (O V A.3) <i>P. C. Hanawalt (USA)</i>
2.30pm-3.00pm	TFIIE and TFIID between transcription and repair (O V A.2) <i>J. M. Egly (France)</i>
3.00pm-3.30pm	
AMPHI B	Mutational signatures of known environmental carcinogens - Session XI A Chair : W. Franklin (USA) and D. Papadopoulou (France)
2.00pm-3.30pm	A) Gene and chromosomal levels Structure-function studies of DNA polymerase error specificity (O XI A.1) <i>T. A. Kunkel (USA)</i>
2.00pm-2.30pm	Wavelength dependence of UV mutagenesis in mammalian cells (O XI A.3) <i>E. A. Drobetsky (Canada)</i>
2.30pm-3.00pm	Mutation induction at the <i>hprt</i> and <i>aprt</i> loci in wild type and repair deficient mice (O XI A.2) <i>H. Vrieling (The Netherlands)</i>
3.00pm-3.30pm	
AMPHI C	Regulations update and industrial views - Session XIX D Chair : D. Brusick (USA) and J. R. Claude (France)
2.00pm-4.00pm	D) Integration of genotoxicity evaluation in the routine toxicology studies : practical and regulatory considerations Opportunities for the integration of genotoxicity evaluation into general toxicology studies (O XIX D.1) <i>J. MacGregor (USA)</i>
2.00pm-2.30pm	Integration of genotoxicity evaluation into general toxicology studies-The blood micronucleus assay in rodents (O XIX D.3) <i>M. Hayashi (Japan)</i>
2.30pm-3.00pm	Principles and practices for integrating genotoxicity evaluation in routine industrial toxicology studies (O XIX D.2) <i>G. Krishna (USA)</i>
3.00pm-3.30pm	Timing of genotoxicity studies in the toxicological and clinical study programme for a new pharmaceutical (O XIX D.4) <i>L. Müller (Germany)</i>
3.30pm-4.00pm	
3.30pm-5.00pm	POSTER PRESENTATIONS (Sessions I-IV-V-VI-X-XI) and COFFEE BREAK
AMPHI B	WORKSHOP : Session XXIV Meeting on the International Collaborative Project on Micronucleus Frequency in Human Populations <i>M. Fenech (Australia)</i>
3.45pm-4.45pm	
AMPHI A	Nucleotide excision repair and transcription - Session V B Chair : E. Dogliotti (Italy) and E. Sage (France)
5.00pm-6.30pm	B) Consequences on mutagenesis and pathologies Processing of structurally different DNA lesions by nucleotide excision repair (O V A.4) <i>L. H. F. Mullenders (The Netherlands)</i>
5.00pm-5.30pm	Mutations in DNA repair genes : relationships to clinical features (O V B.1) <i>A. R. Lehmann (UK)</i>
5.30pm-6.00pm	Molecular signal for the UV-induced p53 protein stabilization (O V B.2) <i>A. Sarasin (France)</i>
6.00pm-6.30pm	
AMPHI B	Mutational signatures of known environmental carcinogens - Session XI B Chair : W. Franklin (USA) and D. Papadopoulou (France)
5.00pm-6.00pm	B) Pathology and mitochondrial levels p53 mutations and environmental carcinogenesis : relevance to etiology and pathogenesis (O XI A.4) <i>R. Montesano (France)</i>
5.00pm-5.30pm	Clinical presentation of mitochondrial disorders in childhood
5.30pm-6.00pm	<i>A. Munnich (France)</i>

POSTER PRESENTATIONS

Sessions I, IV,V, VI, X, XI

- P I.1 Glutathione S-transferases as risk factors in prostate cancer
Judith Autrup, Lars H. Thomassen, Jørgen H. Olsen and Herman Autrup
- P I.2 Kinetics of adduct formation and spontaneous release by C2, C3 and C4 epoxides with DNA in aqueous solution
David Watson, Leo Burka, Michael Kohn, Ronald Melnick and Michael Cunningham
- P I.3 Modulation of genetic damage: Experimental interference with mechanisms of metabolic activation
Enrique Zamorano-Ponce, Julia Fernandez Romero, Pilar Rivera Caamaño and Carlos Barrios Guerra
- P I.4 Influence of glutathione S-transferase (GST) T1, M1 AND P1 genotypes on individual sensitivity to cytogenetic effects of 1,2:3,4-diepoxybutane in cultured human lymphocytes
Stefano Landi, Hannu Norppa, Giada Frenzilli, Genziana Cipollini, Isabella Ponzanelli, Roberto Barale and Ari Hirvonen
- P I.5 Mutagenicity testing of the mycotoxin ochratoxin A in human cytochrome P450 expressing cell lines
Els M. de Groene, Gerben J. Schaaf, G. Jean Horbach and J. Fink-Gremmels
- P I.6 Involvement of rat cytochromes P450 in the bioactivation of galangin
Isabel Duarte Silva, Antonio Rodrigues, Jorge Gaspar, Antonio Laires and José Rueff
- P I.7 Expression of human cytochrome P450 1A2 in *Escherichia coli*: A new system for biotransformation and genotoxicity studies of chemical carcinogens
M. Kranendonk, P. Mesquita, A. Laires, N.P.E. Vermeulen and J. Rueff
- P I.8 Expression of cytochromes P450 in human oesophageal mucosa: Relevance to the aetiology of oesophageal cancer
M. Lechevrel, A.G. Casson, J. Marnay, M. Gignoux, D. Arsène, F. Sichel, G. Launoy, A.M. Mandard, P. Gauduchon, C.R. Wolf and C. Wild
- P I.9 Metabolic activation of promutagens/procarcinogens with cell lines expressing human individual CYP genes
Jianmin Wu, Haitao Dong, Qiaofang Chen, Zhunan Cai, Yingnian Yu and Xingruo Chen
- P I.10 Activities and expressions of CYP1AS and 2E1 cancer-resistant rats during the administration of 3'-methyl-4-dimethylaminoazobenzene
Mihi Yang, Ken Higashi and Toshihiro Kawamoto
- P I.11 Species difference in metabolism and metabolic activation of chemicals catalyzed by cytochrome P450 isozymes
Satoru Ohgiya, Takako Goda, Tsunahiro Kii, Tamotsu Hoshino, Tetsuya Kamataki and Kozo Ishizaki
- P I.12 Mitochondrial functionality in the metabolism of several mutagenic anticancer drugs
Carlo Rossi, Paola Poli, Annamaria Buschini and Antonella Pirati
- P I.13 The genotoxicity profile of a new Trinem antibiotic, sanfetrinem cilexetil
Rodolfo Comelli, Johann Oliver, Anita Naidoo, Luca Vandin, Franca Pugnaghi and David Gatehouse
- P I.14 Nitrofuran resistance pathways in *Escherichia coli*: The role of mutations in *NfsA* and *NfsB*
Iain Lambert, Jacqui Whiteway, Peter Koziarz, John Veall and Birte Hoecker

P I.15	O6-alkylguanine-DNA alkyltransferases promote dibromoalkane lethality and mutagenicity in Escherichia coli K-12 <i>Nieves Abril, Francisco L. Luque-Romero, Maria-José Prieto-Alamo and Carmen Pueyo</i>
P I.16	Effect of exogenous metabolic activation on the mutagenicity of 2- and 3-nitrodibenzopyranone isomers and related compounds in <i>Salmonella typhimurium</i> <i>Tetsushi Watanabe, Terue Kasai and Teruhisa Hirayama</i>
P I.17	Bioactivation of the mushroom hydrazine, agaritine <i>Kim Walton, Maurice M. Coombs, Fenton S. Catterall, Ron Walker and Costas Ioannides</i>
P I.18	The role of glutathione S-transferase genes in the susceptibility to genetic damage in humans and rodents <i>Andrew Kligerman, David DeMarini, Carolyn Doerr, Nancy Hanley, Velva Milholland and Alan Tennant</i>
P I.19	Relationship between genotypes and chromosomal aberration frequencies in a normal population <i>J. Pluth, M. Ramsey and J. Tucker</i>
SESSION IV: BASE EXCISION REPAIR	
P IV.1	Searching for APEX family genes in trypanosomatids <i>Alexandre R. Bello, Rodrigo Galhardo, Ana C. Colombo, Julio C. Paixão, Ulisses G. Lopes, Alvaro C. Leitão and Januario B. Cabral-Neto</i>
P IV.2	Repair of Fpg sites at the level of the gene and at the level of the nucleotide in the nuclear and the mitochondrial DNA <i>Valerie Meniel and Ray Waters</i>
P IV.3	Expression of DNA repair genes in unfertilized eggs and 2-cell embryos of mice <i>Xiu Lowe, Emily Panico, Francesco Marchetti and Andrew Wyrobek</i>
P IV.4	Biochemical characterisation of the XRCC1/DNA ligase III human protein complex <i>Richard Taylor and Keith Caldecott</i>
P IV.5	Involvement of proliferating cell nuclear antigen (PCNA) in DNA repair induced in human fibroblasts by oxidative damage and alkylating agents <i>Ennio Prosperi, Monica Savio, Lucia A. Stivala, Santina Quarta, Livia Bianchi and Vanio Vannini</i>
P IV.6	Base excision repair in mammalian cells occurs also in the absence of DNA polymerase β <i>P. Fortini, B. Pascucci, R.W. Sobol, S.H. Wilson and E. Dogliotti</i>
P IV.7	Defective ligation of base excision repair patches in XRCC1 mutant cells <i>Enrico Cappelli, Richard Taylor, Michela Cevasco, Angelo Abbondandolo, Keith Caldecott and Guido Frosina</i>
P IV.8	Evidence for a novel pyrimidine dimer DNA glycosylase in gram-negative bacteria-neisseria mucosa <i>Simon G. Nyaga and R. Stephen Lloyd</i>
P IV.9	A simple assay for AP endonuclease activity in human lymphocytes <i>Anna Redaelli, Raffaella Magrassi, Stefano Bonassi, Angelo Abbondandolo and Guido Frosina</i>
P IV.10	Stable yeast but not human apurinic/apyrimidinic endonuclease transfectants of Chinese hamster cells are more resistant to genotoxic agents <i>Maja Tomicic, Jasna Franekic and Bernd Kaina</i>

- P IV.11 The catalytic mechanism of the Ogg1 protein of *S. cerevisiae*
Pierre-Marie Girard, Nathalie Guibourt and Serge Boiteux
- P IV.12 APNG knockout mice: Investigations on the biological effects of DNA adducts
R.H. Elder, R.J. Weeks, M.A. Willington, K.J. Mynett, A.J. Watson, J.A. Bailey, D.P. Cooper, J.A. Rafferty, B. Deans, J.H. Hendry and G.P. Margison
- P IV.13 Repair of 8-oxoguanine in mammalian cells: The *OGG1* enzymes
J. Pablo Radicella, Claudine Dhérin, Chantal Desmaze and Serge Boiteux
- P IV.14 Family genes in trypanosomatids
Alexandre R. Bello, Rodrigo Galhardo, Ana C. Colombo, Julio C. Paixao, Ulisses G. Lopes, Alvaro C. Leitao and Januario B. Cabral-Neto
- P IV.15 DNA deoxyribophosphodiesterase activity associated with the *Drosophila* ribosomal protein S3
Margarita Sandigursky, Adly Yacoub, Walter A. Deutsch and William A. Franklin
- P IV.16 Identification and characterisation of the mitochondrial and nuclear localisation signal in human uracil DNA glycosylase (UDG)
Marit Otterlei, Terje Haug, Torill A. Nagelhus and Hans E. Krokan
- P IV.17 Nuclear and mitochondrial uracil-DNA glycosylases are generated by alternative splicing and transcription from different positions in the UNG gene
Hilde Nilsen, Kristin Solum, Terje Haug, Rune Standal and Hans E. Krokan
- P IV.18 Nitrosated peptides and polyamines as endogenous mutagens in O⁶ Alkyltransferase deficient cells
Barbara Sedgwick
- SESSION V: NUCLEOTIDE EXCISION REPAIR AND TRANSCRIPTION
- A. Molecular mechanisms
- P V.1 The SOS response of *E. coli* is required for global nucleotide excision repair of cyclobutane pyrimidine dimers but not 6-4 photoproducts
David J. Crowley and Philip C. Hanawalt
- P V.2 Comparative sequence analysis of human and rodent DNA repair genes
Jane Lamerdin, Paula McCready, Aaron Adamson, Stephanie Stilwagen, Nan Liu, Larry Thompson and Anthony Carrano
- P V.3 Excision repair patch lengths are similar for transcription coupled repair and global genome repair in UV-irradiated human cells
Krista Bowman, Allen Smith and Philip Hanawalt
- P V.4 Nuclear localisation of the XPD protein: A search for the targeting domain
Fabio Santagati, Carlo Rodolfo, Tiziana Nardo, Miria Stefanini and Antonia M. Pedrini
- P V.5 Behavior of RNA polymerase II at a cyclobutane dimer in DNA: Effect of sequence context
Silvia Tornaletti, Brian Donahue, Daniel Reines and Philip Hanawalt
- P V.6 XPA/TFIIP interaction: Enhancement by XPA binding to UV - damaged DNA and possible TFIIP subunits involved
Silvano Nocentini, Frédéric Coin, Masafumi Saijo, Kiyoshi Tanaka and Jean Marc Egly
- P V.7 Nucleotide excision repair and initiation of RNA transcription in an optimized cell-free DNA repair and RNA transcription assay
Masahiko S. Satoh and Philip C. Hanawalt

P V.8	Possible involvement of DNA-dependent protein kinase in the process of nucleotide excision repair <i>Patrick Calsou, Catherine Muller, Caroline Cayrol and Bernard Salles</i>
P V.9	DNA double-strand breaks inhibit nucleotide excision repair by preventing formation of the protein repair complex at sites of damage <i>Philippe Frit, Patrick Calsou and Bernard Salles</i>
P V.10	Repair of benzo[a]pyrene diol epoxide DNA adducts in the human P53 gene at nucleotide resolution <i>Mikhail Denissenko, Gerd Pfeifer, Annie Pao and Moon-shong Tang</i>
P V.11	Repair of DNA adducts induced by 2-amino-3-methylimidazo-(4,5-f) quinoline (IQ), a common food mutagen in cell free extracts of NER proficient and deficient cell lines <i>Christel W. Op het Veld, Robert J. Turesky and Phaik-Mooi Morgenthaler-Leong</i>
P V.12	Repair of benzo[a]pyrene diol epoxide-DNA adducts in the DHFR gene of a human embryonic kidney cell line <i>Laura J. Schild, Charles Allen Smith, Philip C. Hanawalt and William M. Baird</i>
P V.13	Chromosomal distribution of genes subject to transcription coupled DNA repair <i>Jordi Surralles, Parimal Karmakar, A.T. Natarajan and Leon H.F. Mullenders</i>
P V.14	Does the mismatch repair system influence the transcription coupled preferential DNA repair <i>Elzbieta Grzesiuk and Celina Janion</i>
P V.15	Mutational analysis of the NER-protein Swi10 of <i>Schizosaccharomyces pombe</i> <i>Carsten Rödel and Henning Schmidt</i>
P V.16	On UV-induced MFD phenomenon in AB1157 <i>E. coli</i> K-12 strains <i>Celina Janion and Anna Fabisiewicz</i>
P V.17a	Mutation frequency decline and DNA repair in halogen light irradiated <i>Escherichia coli</i> K-12 strains <i>Anna Wöjcik and Celina Janion</i>
P V.17b	UV-Induced Ubiquitination of the large subunit of RNA polymerase II leads to its proteasomal degradation: implications for transcription-coupled DNA repair <i>Joshua N. Ratner, Bhavani Balasubramanian, Jeffry Corden, Stephen L. Warren, and David B. Bregman</i>
P V.17c	Sequestration of the class II transcription factor TBP-TFIID by damaged DNA: structure-function relationship <i>Frédéric Coin, Paul Vichi, Jean-Paul Renaud, Wim Vermeulen, Jan Hoeijmakers, Dino Moras and Jean-Marc Egly</i>
P V.17d	Differential binding of TBP to platinum adducts: relationship in cell toxicity <i>Philippe Frit, Frédéric Coin, Bernard Salles and Jean-Marc Egly</i>
	B. Consequences on mutagenesis and pathologies
P V.18a	Analysis of the molecular defect in patients belonging to the group B of Cockayne's syndrome <i>Stefano Colella, Bianca Tanganelli, Tiziana Nardo, Donna Mallery, Alan R. Lehmann and Miria Stefanini</i>
P V.18b	Molecular alteration in Italian patients affected by xeroderma pigmentosum group C <i>Franz Chavanne, Tiziana Nardo, Alan R. Lehmann and Miria Stefanini</i>
P V.19	UV-C induced mutagenesis in repair deficient human cells <i>Claire Marionnet, Xavier Quilliet, Jacques Armier, Alain Sarasin and Anne Stary</i>

P V.20	Isolation and analysis of spontaneous and UV-induced HPRT mutants of wild-type and thymidine kinase-deficient friend mouse erythroleukaemia (FEL) cells <i>Aida Abu-Baker and Valerie J. McKelvey-Martin</i>
P V.21	DNA repair as a risk factor for non-melanoma skin cancer. A case-control study of psoriasis patients <i>Marianne Dybdahl, Gerda Frentz, H&aring;kan Wallin, Otto M. Poulsen and Bjørn A. Nexo</i>
P V.22	The induction of apoptosis in fibroblasts from UV sensitive repair deficient hereditary syndromes <i>Leela Daya-Grosjean, Sophie Queille, Christiane Drougard, Jean-Claude Ehrhart and Alain Sarasin</i>
P V.23	Genomic instability in an excision repair mutant of drosophila melanogaster <i>Arturo Lspez, Ricardo Marcos and Antonia Velazquez</i>
P V.24	Retroviral-mediated correction of skin cancer-prone, DNA repair-deficient phenotype of xeroderma pigmentosum: Towards a gene therapy <i>Mauro Mezzina, Lin Zeng, Xavier Quilliet, Monique Vuillaume, Francine Puvion-Dutilleul, Jean Krutmann and A. Sarasin</i>
SESSION VI: CHROMATIN AND DNA REPAIR	
P VI.1	Subpathways in base and nucleotide excision repair due to chromatin structure <i>Klaus Erixon, Nina Erixon, Charlotta Stensman and Kristoffer Valerie</i>
P VI.2	Saccharomyces cerevisiae yPTPA1 gene encodes a putative phosphatase activator required for cellular resistance to 4-nitroquinoline-1-oxide <i>Dindial Ramotar, Edith Belanger and Jean-Yves Masson</i>
P VI.3	Chromatin structure and transcription affect repair of cyclobutane pyrimidine dimers by photolyase <i>Bernhard Suter, Magdalena Livingstone-Zatchej, Andreas Meier and Fritz Thoma</i>
P VI.4	Studies on the possible detection of drug-induced topoisomerase I-DNA complexes by nucleotide excision repair <i>Kent Søe, Tinna Stevensner, Grigory Dianov, Ole Westergaard and Vilhelm Bohr</i>
P VI.5	Processing of DNA double-strand gaps ranging from double helix to chromatin fibre dimensions <i>Alexander V. Glasunov, Marlis Frankenberg-Schwager and Dieter Frankenberg</i>
P VI.6	Analysis of mutagen induced double strand breaks in euchromatin and heterochromatin measured by pulsed field gel electrophoresis <i>Roberta Meschini, Loredana Bassi, Pasquale Mosesso, Linda Ottavianelli, Fabrizio Palitti and Natarajan Adayapalam Tyagarajan</i>
P VI.7	Diplochromosome as a tool to study site-specific occurrence of SCE formation <i>Roberta Meschini, Roberta Bastianelli, Francesca Ceciarelli and Fabrizio Palitti</i>
P VI.8	Evaluation of camptothecin-induced genetic damage in G0 human lymphocytes as revealed by premature chromosome condensation (PCC) <i>Pasquale Mosesso, Enrica Fonti, Claudia L. Garcia, Loredana Bassi and Fabrizio Palitti</i>
P VI.9	Mechanisms of formation of chromosome aberrations in first cleavage embryos: Comparison of the effects transmitted by chemically treated male and female gametes <i>Francesca Pacchierotti, Bruno Bassani, Roberto Ranaldi and Cecilia Tiveron</i>
P VI.10	Effect of 2-butoxyethanol on poly(ADP-ribosylation) in Syrian hamster embryo cells <i>Jean-Christophe Hoflack, Marie-José Durand, Stéphanie Alexandre, Guy Poirier and Paule Vasseur</i>

P VI.11	Influence of caffeine and cytosine arabinoside on the induction of chromosomal aberrations by 5-azacytidine in CHO-K1 (wild-type) and xrs-5 (mutant) cell lines <i>E.T. Sakamoto-Hojo, K.C. Bicego, S.A. Takahashi-Hyodo, D.C. Tavares and F.L. Dias</i>
P VI.12	Genomic instability induced by variation in the DNA methylation pattern <i>Paola Vagnarelli, Chiara Corso, Elena Raimondi and Luigi De Carli</i>
P VI.13	Studies of sister-chromatid exchanges and chromosome aberrations in cultured human peripheral blood lymphocytes treated with insulin <i>Ninoslav Djelic*, Bogosav Soldatovic* and Marko Andjelkovic*</i>
P VI.14	Increased nuclear incorporation of 3H-thymidine in neurons of corporis amygdaloidei in male rats neonatally treated with estradiol <i>Dijana Djelic, Ninoslav Djelic, Olivera Lozance and Dmitar Dreklc</i>
P VI.15	Study of DNA repair, chromosome aberrations and interferonogenesis in the blood of people exposed to radiation as a result of the accident at the Siberian atomic plant <i>Nicolai Ilyinskikh, Alexander Yurkin and Ekaterina Ilyinskikh</i>
P VI.16	Cytogenetic disturbances and testosterone level in blood of women with expressed hirsutism <i>Gayane Zalinyan, Nina Vartazaryan, Anahit Martirosyan, Armen Nersesyan and Rouben Arutyunyan</i>
P VI.17	UVC irradiation, DNA repair and chromatin assembly <i>E. Martini and G. Almouzni</i>
SESSION X: IONIZING RADIATION AND MECHANISMS OF GENETIC INSTABILITY	
P X.1	Cytogenetic investigation of effect of low doses of chronic environmental radiation (Chernobyl zone) on murine spermatogenesis <i>Anna Stefanovich, Olga Lakiza and Valentina Kaplina</i>
P X.2	Aneugenic and clastogenic effects of γ -rays detected by fluorescence in situ hybridization (FISH) techniques <i>in vitro</i> in human lymphocytes <i>Nadia Touil and Micheline Kirsch-Volders</i>
P X.3	The ultrastructural observations of micronuclei induced by γ -rays with electron microscopy <i>Jia Cao, Tianmin Cheng, Shexue Liu and Huanan Zheng</i>
P X.4	Preliminary studies on the relationship between cell cycle and micronucleus formation of human lymphocytes induced by γ -rays <i>Shexue Liu, Jia Cao, Lujun Yang, Pin Qian and Tianmin Cheng</i>
P X.5	De novo formation of telomeres in X-ray-sensitive Chinese hamster mutant (xrs 5) following treatment with low and high let radiations <i>F. Darroudi, M. v/d Berg and A.T. Natarajan</i>
P X.6	Mechanisms of low and high LET radiations induced chromosome aberrations: Insights from PCC and FISH <i>F. Darroudi, Z. Fomina, M. Meijers and A.T. Natarajan</i>
P X.7	Chromosome fragility in the field of oncogenes and circulation of a virus of Epstein-Barr among the local population, subjected to effect of radiating deposits <i>Nicolai Ilyinskikh, T.M. Isaeva, I.I. Ivanchuk and E.N. Ilyinskikh</i>
P X.8	Genome instability and decrease of IQ in children whose parents were exposed to radiation in prenatal period as a result of some accidents at the Siberian chemical plant <i>Nicolai N. Ilyinskikh, Ekaterina Ilyinskikh and Irina Ilyinskikh</i>

- P X.9 Influence of donor on kinetics of radiation-induced chromosome aberrations in human lymphocytes as measured by FISH
Alfred McFee, Anne Sayer, Edward Frome and Gayle Littlefield
- P X.10 Influence of dose rate on low and high LET radiations induced chromosomal aberrations (unstable and stable) in human lymphocytes
H.J. Oh, F. Darroudi and A.T. Natarajan
- P X.11 Position effect of translocations involving the inactive X-chromosome. A study combining FISH and immunocytogenetics
J. Surralles and A.T. Natarajan
- P X.12 Radiation-induced chromatid aberrations in ataxia-telangiectasia patients and carriers
A. Tchirkov, J.O. Bay, D. Pernin, Y.J. Bignon, P. Rio, M. Grancho, F. Kwiatkowski, P. Malet and P. Verrelle
- P X.13 A multiple endpoint study of somatic genetic damage from the Chernobyl accident
R.G. Langlois, J.D. Tucker, D.O. Nelson, M.L. Mendelsohn, I. Vorobtsova, P.G. Pleshakov and I.M. Jones
- P X.14 Long deletion mutational spectra in Escherichia coli produced by gamma radiation, UV radiation, or spontaneously are highly similar
Neil Sargentini, Yoo Mee Howard and Laura Tinning
- P X.15 Analysis of mutations in the human HPRT gene induced by heavy-ion irradiation
Fumio Yatagai, Yasuhiro Kagawa, Nobuhisa Fukunishi, Naohito Inabe, Tuneo Shimazu, Masahiko Hirano, Kiyomi Kasai, Yoshiya Furusawa, Kouichi Tatsumi, Masami Watanabe, Takeshi Kato and Fumio Hanaoka
- P X.16 Radioprotective effect of stobadine
Zuzana Kovacikova, Darina Chorvatovicova and Emil Ginter
- P X.17 Site-specific strand break damage in BrdU-containing DNA induced by UV-illumination:
 A comparison with ionising radiation
Zara Doddridge, Jane Warner, Paul Cullis and George Jones
- P X.18 Loss of heterozygosity at 17p is associated with elevated genetic instability in oral premalignant lesions
Miriam Rosin and Lewei Zhang
- P X.19 Residual radiation damage in a bat population residing in a monazite mine
Kathy Meehan, Jakobus Slabbert and Robbie Low
- P X.20 Apoptotic response cells by low doses ionizing radiations
I.I. Ivanchuk, N.N. Ilyinskikh and N.V. Ivanova
- P X.21 The composition and function of lysosomal membrane may be an important factor in the apoptotic response cells
I.I. Ivanchuk, N.V. Ivanova and N.N. Ilyinskikh
- P X.22 The mutagenic effect of radiation on the male mice with hyper- and hypothyroidism disorders
N.V. Ivanova, N.N. Ilyinskikh and I.I. Ivanchuk
- P X.23 Evaluation of risk the development of oxidation stress in people living on radiation polluted territory
S.V. Ryzhov, G.A. Sukhanova and A.E. Sazonov

SESSION XI: MUTATIONAL SIGNATURES OF KNOWN ENVIRONMENTAL CARCINOGENS

A. Gene and chromosomal levels

- P XI A.1 Distinctive mutation spectra at p53 mutation hotspots in lung cancers
T. Hernandez, R. Montesano and P. Hainaut
- P XI A.2 Selected carcinogens investigated in vitro by the HPRT mutation assay
Lotte Risom, Peter Møller and Lisbeth Knudsen
- P XI A.3 Induction and selection of HPRT-mutations in human lymphoblastoid cell lines and analysis of point mutations at the cDNA-level
Ganter Krause, Fatima Garganta, Harry Vrieling and Gerhard Scherer
- P XI A.4 Mutation profile at the HPRT locus in T-cells of healthy non-smoking males
Anne-May Osterholm, Andrej Podlutsky, Sai-Mei Hou and Bo Lambert
- P XI A.5 Damage and mutational hallmark of solar radiations
Evelyne Sage, Daniel Perdiz, Zéno Kuluncsics and Thierry Douki
- P XI A.6 Analysis of genetic toxicity of 22 chemicals and ultraviolet (UV) to ω -DNA
Yang Cao, Jia Cao, Lin Zhang, Liping Xu, YanYu Liu and Lujun Yang
- P XI A.7 The application and construction of ω -DNA with LacZ repackaged in vitro for mutation measurement
Tao Wu, Jia Cao, Ping Qian, Mingja Yang and Lujun Yang
- P XI A.8 A gene trap approach to isolate DNA damage inducible genes: Cloning of a new gene involved in the cellular response to genotoxic stress
Paola Menichini, Silvia Viaggi, Elena Gallerani, Alberto Comes, Annalisa Zunino, Gilberto Fronza, Laura Ottaggio, Joackim Ellwart and Angelo Abbondandolo
- P XI A.9 Carcinogen specific mutational fingerprints at the human p53 locus with a yeast functional assay
Alberto Inga, Paola Monti, Sara Cresta, Anna Aprile, Gina Scott, Angelo Abbondandolo, Phil Burns and Gilberto Fronza
- P XI A.10 Trans-dominance analysis of p53 mutants by a yeast functional assay
Gilberto Fronza, Alberto Inga, Sara Cresta, Paola Monti, Anna Aprile, Richard Iggo and Angelo Abbondandolo
- P XI A.11 Spectrum of UV radiation-induced damage in the human *p53* gene by polymerase stop assay
Gina Scott and Phil Burns
- P XI A.12 Loss of heterozygosity at *FHIT* region in lung cancer
Lea Pylkkänen, Sisko Anttila, Antti Karjalainen, Harri Vainio and Kirsti Husgafvel-Pursiainen
- P XI A.13 Comparative assessment of genetic toxicity of mutagens/carcinogens by micronucleus test in mouse/rats several organs
Ljudmila P. Sycheva, Vjacheslav S. Zhurkov, Olga Salamatova and A.N. Sysin
- P XI A.14 Genetic analysis of PhIP intestinal mutations in MutaTM Mouse
Anthony M. Lynch, Nigel J. Gooderham and Alan R. Boobis

- P XI A.15 Profiles of chemically induced nucleotide substitutions obtained by reversion of *lac Z* point mutations in a set of *Escherichia coli* tester strains
Fatima Garganta, Gerhard Scherer and Günter Krause
- P XI A.16 Studies on the inactivation of carcinogenic MNNG by the addition of soluble vitamins and SH compounds
Teruhisa Hirayama, Yasushi Katayama, Terue Kasai and Tetsushi Watanabe
- P XI A.17 Molecular analysis of mutations in AS52 cells induced by 5-azacytidine
Zsolt Kelecsényi, Diane L. Spencer and William J. Caspary
- P XI A.18 Mutagenic specificity of acrolein and crotonaldehyde in the supF shuttle vector system
Masanobu Kawanishi, Tomonari Matsuda, Go Sasaki, Takashi Yagi, Saburo Matsui and Hiraku Takebe
- P XI A.19 DNA and cell ultrastructure damage following cadmium administration on the skin
Caroline Fasanya, Lema Gilliard, Ray Menard, Akinyela Abdullah, Glenn Sponholtz, Christopher Ikediobi and Lekan M. Latinwo
- P XI A.20 Study of metabolism of the 7-methoxy-2-nitronaphtho 2,1-b]furan (R7000) and analysis of its genotoxicity under aerobic and anaerobic conditions
E. Touati, P. Quillardet and M. Hofnung
- P XI A.21 Structure-genotoxic activity relationship of nitrofuran derivatives
Eliette Touati, Philippe Quillardet and Maurice Hofnung
- P XI A.22 Identification of APRT gene mutations induced in repair-proficient and P450 expressing CHO cells by the food related mutagen/carcinogen
R. Vikse, R.W. Wu and J.S. Felton
- P XI A.23 Mutational spectra induced by PhIP and N-OH-PhIP at the *gpt* locus of CHO AS52 cells
Nina Ostenfeldt, Henrik Frandsen and John Christian
- B. Pathology and mitochondrial levels
- P XI B.1 DNA repair of UV photoproducts and mutagenesis in human mitochondrial DNA
B. Pascucci, A. Varsteegh, A. van der Leer-van Hoffen, A.A. van Zeeland, L.H.F. Mullenders and E. Dogliotti
- P XI B.2 Sequence analysis of mitochondrial rRNA gene of spontaneous mutants resistant to chloramphenicol in chinese hamster cells
Takaji Ikushima and Kazunari Hashiguchi
- P XI B.3 Mitochondrial DNA damage induced by AZT in rats
C. Scotti, L. Iamele, O. Cazzalini, M. Savio, L. Stivala, C. Badulli, S. Quartar, R. Melli, R. Pizzala, L. Rehak, V. Vannini and L. Bianchi

WEDNESDAY SEPTEMBER 10 1997

AMPHI A	Base excision repair - Session IV Chair : B. Sedgwick (UK) and F. Laval (France)
8.30am-10.30am	O6-Alkylguanine-DNA alkyltransferase : kinetic considerations and mechanistic implications (O IV.3) <i>S. A. Kyrtopoulos (Greece)</i>
9.00am-9.30am	The repair of damaged bases by 3-methyladenine DNA glycosylases <i>L. Samson (USA)</i>
9.30am-10.00am	Human uracil-DNA glycosylase : genetics and structure - function relationships (O IV.2) <i>H. E. Krokan (Norway)</i>
10.00am-10.30am	Poly (ADP-ribose) polymerase interacts with the base excision repair factor XRCC1 and is required in recovery from DNA damage in mice and in cells (O IV.4) <i>G. de Murcia (France)</i>
 AMPHI B	 Metabolism of mutagens and chemical carcinogens - Session I Chair : A. Abbondandolo (Italy) and P. Beaune (France)
8.30am-9.00am	Metabolic activation and detoxification of carcinogens in relation to DNA adduct levels and cancer susceptibility in humans (O I.2) <i>F. F. Kadlubar (USA)</i>
9.00am-9.30am	Roles of human cytochrome P450s1A1,1A2,1B1, 2E1, and 3A4/5/7 in the activation of environmental procarcinogens and promutagens (O I.4) <i>T. Shimada (Japan)</i>
9.30am-10.00am	Cytosol of human erythrocytes increases the mutagenicity of ethylene oxide (O I.3) <i>F. Oesch (Germany)</i>
10.00am-10.30am	Chemistry of DNA-carcinogen adducts : formation and biological effects (O I.1) <i>F. Guengerich (USA)</i>
10.30am-11.00am	POSTER PRESENTATIONS (Sessions VII-XII-XIII) and COFFEE BREAK
 AMPHI A	
11.00am-1.00pm	EEMS General Assembly / Frits Sobels Award lecture by Professor G. Oliveri
12.30pm-2.00pm	MEAL
2.00pm-7.00pm	EXCURSION

POSTER PRESENTATIONS

Sessions VII, XII, XIII

- P VII.1 Induction of p21^{cip1/waf1} and concomitant G1 arrest are p53-independent in UVC-irradiated human fibroblasts
Martin Loignon, Raouf Fetni and Elliot Drobetsky
- P VII.2 Expression of p53 by hepatocarcinogens and non- hepatocarcinogens and its role in tumour promotion
Hilde van Gijssel, Ulla Stenius, Leon Mullenders and John Meerman
- P VII.3 A gene trap approach to isolate DNA damage inducible genes: Cloning of a new gene involved in the cellular response to genotoxic stress
Paola Menichini, Silvia Viaggi, Elena Gallerani, Alberto Comes, Annalisa Zunino, Gilberto Fronza, Laura Ottaggio, Joackim Ellwart and Angelo Abbondandolo
- P VII.4 DNA interstrand cross-link specific apoptosis in VH4 and VC8 hamster cell mutants
Florence Larminat, Efterpi Papouli, Corinne Lafon, Annie Valette, Małgorzata Z. Zdziennicka and Martine Defais
- P VII.5 Role of the Fanconi anemia C gene in the control of apoptosis
Christel Guillouf, Agnès Ridet, Tsu-Shing Wang, Ethel Moustacchi and Filippo Rosselli
- P VII.6 Oxidative stress regulation after retroviral-mediated correction of xeroderma pigmentosum group D and C fibroblasts
Monique Vuillaume, Neso Sojic, Séphane Arbault, Christian Amatore, Xavier Quillet, Mauro Mezzina and Alain Sarasin
- P VII.7 Low doses of the food mutagen quercetin induce an adaptive response to mitomycin C, H₂O₂ and quercetin in V79 cells
N.R.G. Oliveira, A.S. Rodrigues, T. Chaveca and J. Rueff
- P VII.8 Colchicine induces synaptic arrest and metaphase nodisjunction in male mouse: A possible checkpoint at pachytene
J. Nath, M. Moses and J. Tepperberg
- P VII.9 Molecular analysis of rearrangements, deletions and multiple mutations in UV-irradiated human cells
Tamara Basii-Zaninovic', Angelo Salvatore Calcagnile and Eugenia Dogliotti
- P VII.10 Differential expression of immune components in rat stomach pyloric mucosa after short-term exposure to N-Methyl-N'-Nitro-N-Nitrosoguanidine (MNNG)
Chie Furihata, Masashi Oka and Yoshiyuki Sakaki
- P VII.11 The investigation of the cytotoxic and genotoxic effects of nickel
J.A. Mc Sweeney and C. Mothersill
- P VII.12 Mitotic-spindle poisons (nocodazole and taxol) induce apoptosis by p53-dependent and - independent pathways
A. Elhajouji, K. Geleyns, M. Cunha, W.B. Fulton, M. Tuynder, E. Cundari and M. Kirsch-Volders
- P VII.13 Pseudorabies growth factor protects cells against DNA damage
Maria Dusinska, Lenka Chovancova, Frantisek Golais and Jan Lesko

P VII.14	The MEC1, POL2, RAD53, DUN1 <i>Saccharomyces cerevisiae</i> regulatory genes do not affect DNA damage-inducible expression of the MAG gene encoding 3-methyladenine DNA glycosylase <i>Magorzata Adamczyk and Ewa Sledziewska-Gojska</i>
P VII.15	The <i>Saccharomyces cerevisiae</i> SGE1 gene encodes a multidrug resistance transporter located in the plasma membrane <i>Monika U. Keller Seitz, Ann E. Ehrenhofer-Murray and Christian Sengstag</i>
P VII.16	Development of yeast strains containing human minisatellites: A new genotoxicity assay for environmental mutagens? <i>Jacques Tessier, Laurent Pascual, Hélène Debrauwere, Dominique Aubert, Nadine Hassaine-Gillyboeuf, Alain Nicolas and Gilles Vergnaud</i>
P VII.17	Bacterial O6-methylguanine-DNA methyltransferase prevent induction of plasminogen activator by MNNG in Mer- human tumor cells <i>Jasna Soriæ and Jadranka Lonèarek</i>
P VII.18	<i>Uvr</i> ⁺ -dependent induction of the aidB1 gene in <i>Escherichia coli</i> and <i>Salmonella typhimurium</i> by anaerobiosis and by acidification <i>Natasa Peric', Mirela Ivancic and Visnja Bacun-Druzina</i>
P VII.19	Suppression of SOS-inducing activity of Trp-P-1 by <i>Meso</i> dihydroguaiaretic acid from <i>Machilas thunbergii</i> in <i>Salmonella typhimurium</i> TA1535/pSK1002 umu test <i>Mitsuo Miyazawa, Kayo Oshiro, Yoshiharu Okuno, Hiroyuki Kasahara, Hideo Shimamura, Seiichi Nakamura and Hiromu Kameoka</i>
P VII.20	UV-irradiation induces the expression of a mouse gene encoding a nuclear DNA-binding protein akin to <i>E. coli</i> RecA protein <i>P. Kannouche, A. Tissier, G. Pinon-Lataillade, D.S.F. Biard, Ph. Mauffrey, M. Mezzina, A. Sarasin and Jaime F. Angulo</i>
P VII.21	Effects of weak ELF magnetic fields and nalidixic acid on induction of recA-lacZfusion in <i>E. coli</i> cells <i>Igor Belyaev, Maria Näslund and Mats Harms-Ringdahl</i>
P VII.22	<i>isfA</i> Mutation inhibits UV-induced GC→AT and AT→GC transitions in <i>recA</i> ⁺ strains and GC→TA and AT→TA transversions in <i>recA730</i> strains <i>Anna Bebenek and Irena Pietrzykowska</i>
P VII.23	Transport pollutions and their influence to human emotional stress <i>Faena Ingel, Tatyana Tsutsman, Elena Kvitsova, Ludmila Khripach, Valentina Yurchenko, Nadezhda Yurtseva and Julia Revazova</i>
P VII.24	Okadaic acid stimulates phospholipase A2, cyclooxygenase and lipooxygenase <i>Céline Huynh, Eric Pinelli, Simone Puiseux-Dao and Annie Pfohl-Leszkowicz</i>
SESSION XII: GERM LINE MUTATIONS IN MAMMALS AND RISK EVALUATION	
P XII.1	Genetic damage in relation to acute toxicity of chemicals <i>Ekkehart Wogel, Madeleine Nivard and Paul Lohman</i>
P XII.2	Comparison of the enzyme-activity mutation frequencies in germ cells of mice and golden hamsters after exposure to 2 + 2 Gy irradiation <i>Walter Pretsch and Jack Favor</i>
P XII.3	In vitro studies of DNA damage and repair in spermatogenic cells from rats and humans <i>Christine Bjørge, Ann-Karin Olsen, Richard Wiger, Gunnar Brunborg, Jørn A. Holme, Tim Scholz and Erik J. Søderlund</i>

P XII.4	DNA damage induced by the drinking water mutagen MX in vivo and in vitro <i>Gunnar Brunborg, Unni Haddeland and Jørn A. Holme</i>
P XII.5	Two organophosphorus compounds induce DNA single strandbreaks in primary rat testes cells in vitro but not in vivo <i>Susanne Brendler-Schwaab and Bernd Herbold</i>
P XII.6	Comparison of inherited and somatic p53 mutations in human cancers <i>Tina Hernandez, Pierre Hainaut, Paul Kleihues and Hiroko Ohgaki</i>
P XII.7	Detection of DNA damage and its repair in germ cells of male mice treated with TCDD <i>Masao Inoue, Takayuki Kurihara, Tadashi Ueda and Taisei Nomura</i>
P XII.8	Estimating the risk of dominant lethals and heritable translocations using chromosome painting of mouse zygotes and two-cell embryo <i>Marchetti Francesco, Jack Bishop, Xiu Lowe and Andrew J. Wyrobek</i>
P XII.9	Cross-linking is the major action principle responsible for the high carcinogenicity of polyfunctional alkylating agents <i>John P.H. Wijen, Madeleine J.M. Nivard and Ekkehart W. Vogel</i>
P XII.10	Trans-dominance analysis of <i>p53</i> mutants by a yeast functional assay <i>Gilberto Fronza, Alberto Inga, Sara Cresta, Paola Monti, Anna Aprile, Richard Iggo and Angelo Abbondandolo</i>
P XII.11	Prospects for the use of transgenic mouse models to assess germ line risk from chemicals <i>George R. Douglas, Jianli Jiao, John D. Gingerich and Lynda M. Soper</i>
P XII.13	Aneuploidy frequency in sperm nuclei of five healthy donors assessed by three-colour FISH <i>Roberto Scarpato, Alessio Naccarati, Massimo Mariani and Lucia Migliore</i>
P XII.14	Evaluation of clastogenicity of chemical agents using in vitro assay with human spermatozoa <i>Hiroyuki Tateno, Sumio Iijima, Akio Asaka and Yujiro Kamiguchi</i>
P XII.15	Evaluation of chromium picolinate in the Ames and the rat in vivo chromosomal aberration assays <i>Henry J. Esber, Victor Moreno and Kenneth S. Loveday</i>
P XII.16	Bio-anticlastogenic effects of mustard oil and garlic in the first-generation offsprings of sodium arsenite treated mice <i>T. Das, A. Roychoudhury and A. Sharma</i>
P XII.17	Sister-cromatid exchanges induced by disulfiram in somatic and germ cells of mice treated in vivo <i>Eduardo Madrigal-Bujaidar, Norma Velazquez-Guadarrama, Pedro Morales-Ramirez, Ma. Teresa Mendiola and Alfredo Lagunas-Martinez</i>
P XII.18	Chromatic aberrations on spontaneous abortions <i>L.V. Thopikashvili, L.V. Tsallagova, I.A. Habieva, A.N. Chehoeva and J.N. Halina</i>
P XII.19	The complex estimation of ecological risk factors in the forming of the reproductive pathology in Vladikavkaz <i>L.V. Tsallagova, L.V. Tchopicashvily, L.A. Bobylerva, F.G. Tezeeva, E.G. Kenkadze, K.K. Tsallagov and Nosu</i>

SESSION XIII: IDENTIFICATION AND EVALUATION OF ENVIRONMENTAL MUTAGENS, ECOGENOTOXICOLOGY

- P XIII.1 Using wild living rodents in monitoring studies
Lilianne Abramson-Zetterberg, Jan Grawé and Gösta Zetterberg
- P XIII.2 Hypothermia induces micronuclei in mice
Shougo Asanami and Kazuyuki Shimono
- P XIII.3 Micronucleus test of solvent yellow 14 in both peripheral blood and bone marrow of rats and mice
Koji Kondo and Hirofumi Miyajima
- P XIII.4 Induction and persistence of micronuclei in hyperthyroidism patients treated with radioiodine
Sara Gutierrez, Elisabet Carbonell, Pere Galofri, Amadeu Creus and Ricardo Marcos
- P XIII.5 *In situ* monitoring of micronuclei in erythrocytes of *Therapon jarbua* before and after operation of Daya Bay nuclear power station
Yana Cai, Liming Qian, Haiyan He, Genchang Sun and Jingyuan Zhao
- P XIII.6 Enhancement of micronuclei frequency in the Tradescantia/micronuclei test using a long recovery time
Egizia Falistocco, Silvano Monarca, Alberto Zanardini and Ilaria Zerbini
- P XIII.7 Micronucleus assay in *Allium cepa* irradiated roots
Jasna Paradiz, Blanka Druskovic, Janez Skrk and Milan Lovka
- P XIII.8 Formation and persistence of DNA adducts and micronuclei in rainbow trout after treatment with benzo[a]pyrene
Paola Venier, Sandra Minissi, Riccardo Voltan, Eleonora Ciccotti and Alessandro Pinna
- P XIII.9 Persistence of DNA adducts and micronuclei in mediterranean mussels exposed to benzo[a]pyrene
Paola Venier, Claudia Zampieron and Sabrina Canova
- P XIII.10 Development of a genotoxicity assay in aquatic organisms using arbitrarily-primed polymerase chain reaction
Franck Atienzar, Britt Cordi, Andy Evenden, Awadhesh Jha and Michael Depledge
- P XIII.11 *In vitro* validation of single cell gel electrophoresis assay (SCGE) by the use of standard mutagens and non-mutagens in peripheral human leukocytes
Giada Frenzilli, Elena Bosco and Roberto Barale
- P XIII.12 Occupational and environmental mutagenesis: Validation and application of the HPRT in vivo mutation assay for risk assessment in humans (EUCAHM)
Bo Lambert, Yvonne Barnett, Barbara Livingstone, Margaret Davies, David Lovell, Edith Huttner, Jurgen Kiefer, Gunter Speit, Lucia Celotti, Patrizia Hrelia, Ad Tates and Hannu Norppa
- P XIII.13 Tobacco cotyledons-Quick and sensitive test for the study of mutagenicity
Ivan Baburek, Blanka Stiburkova and Karel J. Angelis
- P XIII.14 Examination of genotoxic and non-genotoxic compounds by the simplified and highly sensitive assay method using Raji cells for the detection of tumor promoting activity
Kiyomi Ohmori, Michiko Kishi, Tadayoshi Nakaoka, Kaoru Miyazaki and Makoto Umeda
- P XIII.15 Determination of sample concentrations for the allium anaphase chromosome aberration assay
Jette Rank
- P XIII.16 Honeybee populations as ecotoxicological indicators
Zifa Saifutdinova and Guzel Shangaraeva
- P XIII.17 Cytogenetic monitoring of children living in chemically polluted areas
Stoyan Lalchev and Veneta Georgieva

P XIII.18	Chromosome damages in adolescents of Kemerovskaya oblast' as an indicator of genotoxic environmental factors' effect <i>Vladimir Druzhinin, Aleksei Lifanov, Varvara Stas and Tatiana Tolochko</i>
P XIII.19	Cytogenetic damage in peripheral lymphocytes of human beings living in the radioactive contaminated territories of Ukrainian Polissia <i>Alexander Kravchuk, Elena Zubko, Irina Boltina, Alexander Ohrimovich and Dmitry Pigida</i>
P XIII.20	A family study of baseline chromosomal aberration and sister chromatid exchange frequencies <i>Caterina Paola Milillo, Isabella Sbrana, Michela Ballardin, Linda Chelotti, Tania Davini, Alessandra Di Sibio, Giada Frenzilli, Federica Gemignani, Adriana Lori, Walter Lubrano, Antonella Luccini, Antonella Marazzini, Carmela Morizzo, Lucia Petrozzi, Barbara Pinto, Isabella Ponzanelli, Vittoria Scarcelli, Antonella Strano, Alessandra Tessa, Cristina Wassalle and Roberto Barale</i>
P XIII.21	Influence of GSTT1 and GSTM1 genotype on spontaneous chromosomal aberration and sister chromatid exchange frequencies <i>Anna Maria Rossi, Caterina Paola Milillo, Maria Bulleri, Chiara Guarnieri, Stefano Landi and Roberto Barale</i>
P XIII.22	GSTM1 and CYP1A1 gene polymorphisms in French patients with cystic fibrosis <i>Helena Baranova, André Labbé, E. Albuison, Vladislav S. Baranov and Paul Malet</i>
P XIII.23	Effects of cigarette smoking on the personal exposure to mutagens in air <i>Kazutoshi Sugita, Osamu Endo, Michiko Koyano, Yukihiko Takagi, Ken-ichi Kohzaki and Sumio Goto</i>
P XIII.24	Monitoring anaesthesiologists exposed to anesthetic gases <i>Ana Regina Chinelato</i>
P XIII.25	Comparative toxicogenetic monitoring study of Moscow and Jaroslavl oil refinery workers <i>Tatyana Tsutsman, Faena Ingel, Ludmila Khripach, Valentina Yurchenko, Elena Kivtsova, Nadezhda Yurtseva and Julia Revazova</i>
P XIII.26	Yield of delayed lethal mutations in surviving progeny in relation to initial toxicity of a range of environmental mutagens <i>Carmel Mothersill, Maria Lyons, James McSweeney, Joseph O'Reilly and Colin Seymour</i>
P XIII.27	Spontaneous level of chromosome aberrations in the Czech Republic <i>Pavel Rössner, Hana Bavorova, Dana Ocadlikova, Milena Černá, Radim J. Šram and Eva Svandová</i>
P XIII.28	Cells of patients with Familial Mediterranean Fever as new model for testing of genotoxins <i>Tamara Sarkisian, Rouben Arutyunian and Asmik Mejlumian</i>
P XIII.29	Increased chromosome aberrations in genetically predisposed cigarette smokers <i>Nivea Conforti-Froes, Randa El-Zein, Sherif Abdel-Rahman and William Au</i>
P XIII.30	The genotoxicity monitoring of air, water and soil - A preliminary report of the International Programme on Plant Bioassays (IPPB) <i>Te-Hsiu Ma, William F. Grant and Frederick J. de Serres</i>
P XIII.31	DNA adducts induced by fractionated extract of urban air particles in primary rat hepatocytes <i>Jan Topinka, Thomas Wolff, Leslie Schwarz, Jan Lenicek and Radim J. Šram</i>
P XIII.32	Ozone application in water treatment and induction of gene mutation in biological objects <i>Ihor Bariliak and Alexei Dougan</i>

P XIII.33	Genotoxic assessment of Rio Tercero river waters (Cordoba, Argentina) under the influence of an industrialized area <i>Lina Magliola, Jeronimo Andrade, Xenia Magliola, Oscar Pessat and Marta Fenoglio</i>
P XIII.34	Mutagenicity of airbone particulate samples in different areas of the Rio Grande do Sul State, Brazil <i>Rubem Horn, Ana Mittelstae, Irascema Azevedo and Vera Vargas</i>
P XIII.35	Evaluation of water mutagenicity and toxicity after disinfection with peracetic acid <i>Silvano Monarca, Alberto Zanardini, Donatella Feretti, Licia Guzzella, Ilaria Zerbini and Giuseppe Nardi</i>
P XIII.36	Genotoxicity in mineral water stored in polyethylene terephthalate bottles evaluated using plant bioassays <i>Silvano Monarca, Alberto Zanardini, Domenica Biscardi, Donatella Feretti, Raffaele De Fusco, Ilaria Zerbini and Giuseppe Nardi</i>
P XIII.37	Monitoring nitrosamines and other air genotoxins in rubber industries <i>Silvano Monarca, Alberto Zanardini, Berthold Spiegelhalder, Donatella Feretti, Massimo Moretti, Milena Villarini, Michele Libraro, Piera Antonelli and Giuseppina Scassellati-Sforzolini</i>
P XIII.38	Evaluation of mutagens in contaminated soils using bacterial and plant assays <i>Silvano Monarca, Alberto Zanardini, Donatella Feretti, Sergio Resola, Roberto Marchetti, Silvia Manfredi and Giuseppe Nardi</i>
P XIII.39	Mutagenicity monitoring and chemical analysis of river waters and their fractions <i>Milena Cerna, Anna Pastorkova, Jiri Smid, Josef Zavadil and Pavel Rössner</i>
P XIII.40	Evaluation of mutagenic activity in Volturno River Water, Southern Italy <i>Domenica Biscardi, Mario Carfagna, Marina Isidori, Alfredo Parrella and Giovanni Pontecorvo</i>
P XIII.41	Genotoxicity of wastewater from industry and municipal treatment <i>Mette Hviid Nielsen</i>
P XIII.42	Mutagenic activity of chlorinated bis(propyl)ethers: Major pollutants in the Elbe River <i>Götz Neurath, Brigitte Gutendorf, Johannes Westendorf, Stephan Franke, Wittko Francke and Hans Marquardt</i>
P XIII.43	Isolation of mutagens in water from the Nishitakase river in Kyoto <i>Haruo Nukaya, Kuniro Tsuji, Takeshi Ohe, Atsuko Oguri, Takashi Sugimura and Keiji Wakabayashi</i>
P XIII.44	Mutagenicity of organic pollutants in the Yodo River water with an <i>O</i> -acetyltransferase-overexpressing strain <i>Takeshi Ohe</i>
P XIII.45	Genotoxicity related to nitroarenes in rain water from urban road <i>Yoshiro Ono, Yuji Hashizume, Yoshinori Kanjo and Yoshimitsu Oda</i>
P XIII.46	Evaluation of genotoxicity at a tannery waste site using EROD, DNA adduct and micronuclei biomarkers on larvae of the amphibian <i>xenopus</i> complements physico-chemical analyses <i>Corinne Bekaert, Josette Marty, Annie Pfohl-Leszkowicz and Vincent Ferrier</i>
P XIII.47	Genotoxicity of coke oven and urban air particulate matter in <i>in vitro</i> assays coupled with ³² P-postlabelling and HPLC analysis of DNA adducts <i>Blanka Binkova, Jan Lenicek, Ivan Benes, Ondrej Gajdos and Radim J. Sram</i>
P XIII.48	Chemical and genotoxicological profiling of coke oven emissions in an urban environment <i>Brian McCarry, Laurie Allan, Chung Chiu, Lena Andrew, Krista Barford and Douglas Bryant</i>

P XIII.49	Ecogenotoxicity of contaminated soil samples assessed by the Allium/Vicia root tip test <i>Sylvie Cotelle, Jean-François Masfaraud and Jean-François Férand</i>
P XIII.50	Genotoxicity of soil irrigated with wastewater using three bioassays <i>Guillermo Cabrera, Ma. Guadalupe Rodriguez and Antonio Perez</i>
P XIII.51	Genotoxicity of compost prepared from organic and domestic garbage using three bioassays <i>Guillermo Cabrera, Ma. Guadalupe Rodriguez, Ma. Guadalupe Guerrero and Beatriz Maruri</i>
P XIII.52	Genotoxicity of leachates from a landfill using three bioassays <i>Guillermo Cabrera, Ma. Guadalupe Rodriguez, Ma. Guadalupe Guerrero and Antonio Perez</i>
P XIII.53	Yield of delayed lethal mutations in surviving progeny in relation to initial toxicity of a range of environmental mutagens <i>Carmel Mothersill, Maria Lyons, James McSweeney, Joseph O'Reilly and Colin Seymour</i>
P XIII.54	Genetic toxicology studies comparing cigarettes which burn or primarily heat tobacco <i>David Doolittle, Buddy Brown, Jerry Avalos, David Bombick, Carr Smith, Susan McKarns and Betsy Reed-Bombick</i>
P XIII.55	Multivitamine prophylaxis versus exposure to carcinogenic polycyclic aromatic hydrocarbons (PAHs) <i>Lubomir Dobias, Jaromira Kusova, Jaroslava Havrankova, Jaroslav Sipula, Alena Kloudova and Jana Hornova</i>
P XIII.56	Atmospheric air contamination and demographic process in the cities of Ukraine <i>Alexei Dougan, Olga Timchenko and Elena Touros</i>
P XIII.57	Disinfectants application and induced mutagenesis in salmonella typhimurium <i>Alexei Dougan</i>
P XIII.58	Disinfectants and induction of gene mutation <i>Alexei Dougan and Ihor Bariliak</i>
P XIII.59	Mutagenicity of metals of environmental interest: Application of the human lymphocyte micronucleus assay using the fish technique with a pancentromeric probe <i>Lucia Migliore, Leonardo Cocchi, Claudia Nesti and Enrico Sabbioni</i>
P XIII.60	Identification of cytogenetic alterations induced by heavy metals and organic solvents <i>P. Papazafiri, F.E. Zarani, S. Lalchev, V. Georgieva, A. Vaglenov and A. Kappas</i>
P XIII.61	Organoarsenicals influence chromosome changes in cultured mammalian cells <i>M.J. Autry, B. Hamilton and T.S. Kochhar</i>
P XIII.62	Induction of DNA-repair in cultured porcine and human urothelial cells by the mycotoxin ochratoxin A (OTA) <i>Angelika Flieger, Angelika Doerrenhaus, Klaus Golka, Harald Schulze and Wolfram Foellmann</i>
P XIII.63	Mutagenicity of dog urine extracts by the ultra-low micro suspension assay <i>Yukihiko Takagi, Osamu Endo, Sumio Goto, Yukio Kato, Choji Kaneuchi and Ken-ichi Kohzaki</i>
P XIII.64	Assessment of genotoxic and estrogenic effect of MCPA <i>Elena Szabova and Dagmar Zeljenkova</i>
P XIII.65	1,4-Dioxane: Lack of in vitro genotoxic activity <i>Takeshi Morita and Makoto Hayashi</i>

- P XIII.66 The electron-microscopic analysis of synaptonemal complexes of mice meiocytes exposed in Chernolbyl Atomic Station region
L.D. Safronova and I.N. Ryabov
- P XIII.67 Numerical aberration induction by benzo[a]pyrene and 7,12-dimethylbenz[a]anthracene in Chinese hamster cell lines V79-MZ and V79
Atsuko Matsuoka, Masayasu Ozaki, Kenji Takeshita, Hiroko Sakamoto, Makoto Hayashi and Toshio Sofuni
- P XIII.68 The number and kinds of mutants induced in mammalian cells by arsenic, cadmium and lead
Charles Waldren, Megan McGraw, Diane Vannais, F. Carvalho and Daniel Gustafson
- P XIII.69 Epigenetic events induced by environmental carcinogens in Syrian Hamster Embryo (SHE) cells may be essential to the transformation process
Stéphane Dhalluin, Zoé Elias, Véronique Cruciani, Odile Poirot, Claudine Rast, Laurent Gate, Haim Tapiero, Paule Vasseur and Giao Nguyen-Ba
- P XIII.70 Effect of aromatic amines bioactivation on genetic changes in yeast
Viera Vlckova, Mirka Slaninova, Monika Zavodna, Eva Miadokova, Svetlana Podstavkova and Daniel Vlcek
- P XIII.71 A study of asbestos-induced aneuploidy in Drosophila melanogaster
Wang Hongbing, Huang Jianquan, Li Huaiyi, Wan Xinming, Zhang Youching and Jiang Zuoshu
- P XIII.72 Effect of di(2-ethylhexyl)phthalate on DNA damaging activity of environmental mutagens in Drosophila melanogaster
Kazuaki Kawai
- P XIII.73 Mutagenicity of nitric oxide in DNA-repair deficient bacteria
Rosalie K. Elespuru
- P XIII.74 Mutagenicity and clastogenicity of nitrobenzanthrones
Takeji Enya, Hitomi Suzuki, Yoshiharu Hisamatsu, Tetsushi Watanabe and Teruhisa Hirayama
- P XIII.75 Evaluation of the mutagenic potential of monoterpenoid compounds
Maria Regina Gomes Carneiro, Francisco José Roma Paumgartten and Israel Felzenswabl
- P XIII.76 Use of biomarkers in risk assessment for exposure to environmental heavy metals
R. Vachkova-Petrova, A. Kappas, St. Filipov, E. Tyagunenko and N. Ivanova
- P XIII.77 Comparison of diesel fuel emissions by the in vitro DNA adduct formation, mutagenic activity and PAH content
Terhi Kuljukka, Leena Rantanen, Seppo Mikkonen, Kimmo Peltonen and Kirsti Savela
- P XIII.78 Biological monitoring of workers exposed to emissions from petroleum plants
Antonina Cebulska-Wasilewska, Diana Anderson, Ewa Niæankowska, Anna Wierzebska, Ewa Kasper, Jane Anne Hughes and Boæena Graca
- P XIII.79 Genetic effects of high and low exposure to heavy metals
Ase Krøkje, Chris Bingham and Cecilie østby
- P XIII.80 Metabolic activation of aromatic amines by algae
Eva Miadokova, Svetlana Podstavkova, Viera Vlckova, Andrea Slivkova, Mirka Slaninova and Daniel Vlcek
- P XIII.81 Differential tissue distribution of DNA adducts in rats exposed to sidestream cigarette smoke
C. Gary Gairola, Jamal M. Arif and Ramesh C. Gupta

P XIII.82	Mutagenicity of dog urine extracts by the ultra-low micro suspension assay <i>Yukihiko Takagi, Osamu Endo, Sumio Goto, Yukio Kato, Choji Kaneuchi and Ken-ichi Kohzaki</i>
P XIII.83	Toxicity of three organic pollutants, nonoxynol, prochloraz and 2,4-dichloroaniline to primary cultures of rainbow trout and a fish cell line <i>Kevin Dowling and Carmel Mothersill</i>
P XIII.84	Azobenzene induced micronuclei in rodent reticulocytes <i>Norihide Asano</i>
P XIII.85	Effects of river waters suspended solids on the detection of mutagenicity with Ames test <i>Laura Christina Lopez and Juan Moretton</i>
P XIII.86	Genotoxicity studies of industrial waste waters with high concentrations of non-mutagenic heavy metals <i>Laura Christina Lopez, Marcelo Daniel Bassi and Juan Moretton</i>
P XIII.87	Effect of GST and NAT genotypes on the lung cancer risk <i>Sirkku T. Saarikoski, Maria Reinikainen, Sisko Anttila, Antti Karjalainen, Kirsti Husgafvel-Pursiainen, Harri Vainio and Ari Hirvonen</i>
P XIII.88	Genetic susceptibility to lung cancer in Japanese, Caucasians and Hawaiians <i>Löic Le Marchand, Lakshmi Sivaraman, Lisa Pierce, Ann Siefried and Annette Lum</i>
P XIII.89	Genotoxic damage in Danish busdrivers <i>Lisbeth E. Knudsen, Hannu Norppa, Per Sabro Nielsen, Henrik Okkels and Herman Autrup</i>
P XIII.90	GSTM1 AND CYP1A1 gene polymorphisms in French patients with cystic fibrosis <i>Helena Barnova, André Labbé, Eliane Albuison, Vladislav S. Baranov and Paul Malet</i>
P XIII.91	Biomonitoring studies on an human population exposed to pesticides <i>Helena Borba, Margarida Monteiro, Maria José Proença and José Rueff</i>
P XIII.92	In vitro induction of micronuclei by benzo (a) pyrene on fish cell lines and detection by flow cytometry <i>P. Sanchez, C. Becerril, M. Carballo, M.J. Muñoz and A. Castaño</i>
P XIII.93	Analysis of BCL-2 translocation in human TK6 lymphoblastoid cells following exposure to 1,2,3,4-diepoxybutane <i>Hongwei Chen, Kathy G. Meyer, Leslie Recio and Douglas A. Bell</i>
P XIII.94	The use of genotoxic endpoints to evaluate occupational exposure to antineoplastic drugs <i>Thomas H. Connor and Ellen S. Baker</i>
P XIII.95	Strong genotoxic activity of fraction PM 10 and especially of fraction PM 2.5 of airborne particulates on human tracheo-bronchial epithelial cells (line BEAS-2B) <i>in vitro</i> <i>Claudia Hornberg, Lolita Maciuleviciute, N.H. Seemayer and Eva Kainka</i>
P XIII.96	Genotoxicity evaluation of the 9C trimethylbenzenes (TMB) <i>Ewa Janik-Spiechowicz, Kalina Wyszynska and Elzbieta Dziubaltowska</i>
P XIII.97	Analysis of micronuclei in erythrocytes of rats treated with TCDD in a liver tumor promotion study <i>Jorma Maki-Paakkanen, Raimo Pohjanvirta, Jouni Tuomisto, Mikko Unkila, Matti Viluksela and Jouko Tuomisto</i>
P XIII.98	DNA adduct detection in the liver of the dragonet Callionymus lyra and the flounder Platichthys flesus: A potential bioindicator of pollutant <i>K. Boillot, T. Burgeot, J.P. Arnould and A. Pfohl-Leszkowicz</i>

P XIII.99	Comparative evaluation of the estrogenic and toxicological potential of environmental compounds with estrogenic activity <i>Manfred Schlager, Franz Krassnigg and Peter Maria Eckl</i>
P XIII.100	DNA damage and repair capacity in blood cells of people exposed to lead in battery factories <i>Helena Groot de Restrepo, Diana Sicard, Maria Mercedes Torres and Camilo Uribe</i>
P XIII.101	Late cytogenetic effects of Chernobyl accident in humans <i>I. Vorobtsova</i>
P XIII.102	Evaluation of mutagenic potential of air pollution existing during wood conversion operations <i>Kalina Wyszynska, Ewa Janik-Spiechowicz and Wieslawa Chwialkowska-Liro</i>
P XIII.103	The influence of anthrax vaccine on mutagenesis <i>Armen Nersesyan and Levon Mkrtchian</i>
P XIII.104	Observation on renal hyperplasia caused by unilateral nephrectomy its significance in search for animal tests for chemical carcinogens <i>Wang Da</i>
P XIII.105	Chromosomal damage in experimental schistosomiasis treated with nicotine and praziquantel <i>Fouad Badr, Howida Abdel-Halim, Samir Imam and Ismail Shalaby</i>
P XIII.106	Genotoxic study of diesel and atmospheric particles: Particular interest of YG <i>salmonella</i> strains for their sensibility to nitroaromatic compounds <i>Claude Beaubestre, Isabelle Vanrullen, Mickaölle Bensoussan, Philippe Pernet, Marie-Caroline Guyot and Fabien Squinazi</i>
P XIII.107	Estimating the mutagenicity of soils after their biological decontamination <i>Katerina Malachova</i>
P XIII.108	Automated metaphase finding: Assessment of the METAFER2 system in routine chromosomal aberration assays <i>Andrée-Anne Chételat</i>
P XIII.109	<i>In vitro</i> evaluation of genotoxic activity of adriamycin and bleomycin in mouse embryo cells which differ in catalase and superoxide dismutase activity <i>Bozena Chlopkiewicz</i>
P XIII.110	Mutagenic activity of chlorinated tap water <i>Mitsuko Kato, Haruko Saito, Shin'ichi Isoda and Noboru Nagaoka</i>
P XIII.111	Mutagenic halogenated furanones occurring in tap water <i>Isabel Ramos, Maia Lloveras, Maria-Pilar Marco and Angel Messeguer</i>
P XIII.112	Crest-staining of micronuclei in free-living rodents <i>Caterina Tanzarella, Francesca Degrassi, Jan Zima, Luisa Anna Ieradi and Mauro Cristaldi</i>
P XIII.113	Role of biological markers in aquatic organisms: <i>in situ</i> biomonitoring studies along the Ligurian coast <i>Claudia Bolognesi, Eleonora Landini and Paola Roggieri</i>
P XIII.114	<i>Drosophila</i> as a biomonitor of water pollution <i>P. Ramos-Morales, G. Ordaz, Y. Dorantes, M. Martinez, H. Rivas, B. Hernandez and A. Rodrigues</i>

- P XIII.115 Broad applicability of the SOS/*umu* -test in environmental genotoxicity testing
Georg Reifferscheid, Claudia Schmid and Rudolf Karl Zahn
- P XIII.116 Histopathological study and mutation analysis of *ras* and *p53* genes in feral flounder liver tumors; relation with environmental pollutants
J. Cachot, Y. Cherel, V. Kadakas, S. Feist, D. Vethaak, F. Galgani and F. Vincent
- P XIII.117 Alkaline elution-A sensitive genotoxicity-Test for unconcentrated surface waters
Petra Waldmann, Imke Metz, Georg Reifferscheid, Steffen Lenz, Marita Mauer and Rudolf-Karl Zahn
- P XIII. 118 Comparison of cytotoxic effects of mercurials on *Allium cepa* *in vivo*
Manomita Patra and Archana Sharma
- P XIII. 119 Observation on renal hyperplasia caused by unilateral nephrectomy its significance in search for animal tests for chemical carcinogens
Wang Da
- P XIII. 120 Azobenzene induced micronuclei in rodent reticulocytes
Norihide Asano
- P XIII. 121 The effect of lead salt on higher plants *in vivo*
Niladri Bhowmik

THURSDAY SEPTEMBER 11 1997

8.30am-10.00am	Plenary Session
AMPHI A	Chair : J. Little (USA) and A. Sarasin (France)
8.30am-9.15am	Tumor suppressor genes : at the crossroads of molecular carcinogenesis and molecular epidemiology (PL 4) <i>C. C. Harris</i>
9.15am-10.00am	Applications of gene / viral therapy in combination with radiation therapy (PL 11) <i>R. Weichselbaum (USA)</i>
10.00am-10.30am	COFFEE BREAK
AMPHI A	Inducible responses to genotoxic stress - Session VII
10.30am-12.00pm	Chair : B. Epe (Germany) and M. Defais (France)
10.30am-11.00am	UVA activation of genes - some clues as to mechanism (O VII.3) <i>R. M. Tyrrell (UK)</i>
11.00am-11.30am	Role of oxidative stress conditions in the activation of the transcription factor NF- κ B (O VII.2) <i>J. Piette (Belgium)</i>
11.30am-12.00pm	Multiple "sensors" for toxic agents in the genetic stress response (O VII.1) <i>P. Herrlich (Germany)</i>
AMPHI B	Germ line mutations in mammals and risk evaluation - Session XII
10.30am-12.30pm	Chair : P. Lohman (The Netherlands) and G. Lorenzon (France)
10.30am-11.00am	Dominant mutations : from mouse to man (O XII.1) <i>J. Favor (Germany)</i>
11.30am-12.00pm	Prospects for the use of transgenic mouse models to assess germ line risk from chemicals (O XII.2) <i>G. R. Douglas (Canada)</i>
11.00am-11.30am	The roles of traditional and newly-developed methods in identifying mammalian germ cell mutagens (O XII.3) <i>M. D. Shelby (USA)</i>
12.00pm-12.30pm	Genetic damage in relation to acute toxicity of chemicals (O XII.4) <i>E. Vogel (The Netherlands)</i>
AMPHI C	Identification and evaluation of environmental mutagens, ecogenotoxicology
10.30am-1.00pm	Session XIII
10.30am-11.00am	Chair : H. Norppa (Finland) and S. Puiseux-Dao (France) Mutation in human cells and enhanced gene expression in rodent cells induced by electro-magnetic fields (O XIII.5) <i>H. Takebe (Japan)</i>
11.00am-11.30am	Cytogenetic methods to evaluate the mutagenicity of chemical contaminants in the marine environment (O XIII.1) <i>A. Jha (UK)</i>
11.30am-12.00pm	The application of genetic toxicology in the analysis of the consequences of a major marine pollution incident (O XIII.2) <i>J. M. Parry (UK)</i>
12.00pm-12.30pm	Identification of DNA repair genes in plants (O XIII.4) <i>C. F. Menck (Brazil)</i>
12.30pm-1.00pm	Cytogenetic investigation on children exposed to Tchernobyl radioactive fallout : 10 years later (O XIII.3) <i>R. Barale (Italy)</i>
12.30pm-2.00pm	MEAL
AMPHI A	DNA recombination, transposition, amplification - Session VIII
2.00pm-4.00pm	Chair : A. Carrano (USA) and F. Fabre (France)
2.00pm-2.30pm	Protein-directed molecular interactions in recombination and repair (O VIII.1) <i>S. C. West (UK)</i>
2.30pm-3.00pm	Meiotic recombination and human minisatellite rearrangements in the yeast <i>Saccharomyces cerevisiae</i> (O VIII.2) <i>A. Nicolas (France)</i>
3.00pm-3.30pm	Loss of genomic integrity in preneoplastic cells (O VIII.3) <i>T. D. Tlsty (USA)</i>
3.30pm-4.00pm	Biological significance of gene amplification in cancer (O VIII.4) <i>M. Terada (Japan)</i>

AMPHI B	DNA adducts and human cancers - Session XVI A Chair : J. Cole (UK) and G. Dirheimer (France)
2.00pm-4.00pm	A) Biomonitoring Carcinogen adducts in humans resulting from endogenous and exogenous exposures (O XVI A.1) <i>P. B. Farmer (UK)</i>
2.00pm-2.30pm	Occupational biomonitoring with cytological or molecular biomarkers : Competition or collaboration ? (O XVI A.2) <i>C. Laurent (Belgium)</i>
2.30pm-3.00pm	1,3-Butadiene and DNA adducts - A rocky road towards human biomonitoring (O XVI A.3) <i>K. Peltonen (Finland)</i>
3.00pm-3.30pm	Measurement of oxidative base damage within cellular DNA and biological fluids (O XVI A.4) <i>J. Cadet (France)</i>
AMPHI C	Biological consequences of sun exposure - Session XVIII A
2.00pm-4.00pm	Chair : A. Yasui (Japan) and M. Mezzina (France)
2.00pm-2.30pm	A) Photomutagenicity and photocarcinogenesis : experimental aspects Photocarcinogenesis : from mouse to man (O XVIII A.1) <i>F. R. de Gruyl (The Netherlands)</i>
2.30pm-3.00pm	A role for UVB radiation-induced immunosuppression in human skin carcinogenesis (O XVIII A.2) <i>M. Grewe (Germany)</i>
3.00pm-3.30pm	Human skin reconstructed <i>in vitro</i> : A three-dimensional model to investigate the effects of UV exposure on epidermal keratinocytes and dermal fibroblasts (O XVIII A.4) <i>F. Bernerd (France)</i>
3.30pm-4.00pm	Epidemiology and prevention of skin cancer in Queensland (O XVIII A.3) <i>A. Green (Australia)</i>
4.00pm-5.00pm	POSTER PRESENTATIONS (Sessions VII-VIII-IX-XII-XIII-XVI-XVIII) and COFFEE BREAK
AMPHI A	Radiation sensitivity, recombination and repair - Session IX
5.00pm-6.30pm	Chair : M. Stefanini (Italy) and P. Calsou (France)
5.00pm-5.30pm	Mutational analysis of the components of DNA-PK (O IX.1) <i>P. Jeggo (UK)</i>
5.30pm-6.00pm	Human SCIDs with increased sensitivity to ionizing radiations and impaired V(D)J rearrangements define new genes involved in DNA recombination/repair (O IX.3) <i>J. P. de Villartay (France)</i>
6.00pm-6.30pm	Molecular cloning and functional characterization of the human XRCC2 DNA repair gene (O IX.2) <i>J. Thacker (UK)</i>
AMPHI B	DNA adducts and human cancers - Session XVI B
5.00pm-6.30pm	Chair : Husgafvel-Pursiainen (Finland) and G. Duménil (France)
5.00pm-5.30pm	B) Molecular epidemiology Genetically based metabolic polymorphisms in epidemiology : methodological issues (O XVI B.3) <i>P. Vineis (Italy)</i>
5.30pm-6.00pm	DNA adduct studies in human populations (O XVI B.1) <i>K. Hemminki (Sweden)</i>
6.00pm-6.30pm	<i>Helicobacter pylori</i> and gastric cancer - A case study in molecular epidemiology (O XVI B.2) <i>D. Forman (UK)</i>
AMPHI C	Biological consequences of sun exposure - Session XVIII B
5.00pm-7.00pm	Chair : R. Crebelli (Italy) and J. J. Legrand (France)
5.00pm-5.30pm	B) Photomutagenicity and photocarcinogenesis : regulatory aspects Light absorbing chemicals : Photoprotection versus photoactivation (O XVIII B.2) <i>E. Gocke (Switzerland)</i>
5.30pm-6.00pm	Photomutagenicity and photocarcinogenicity of pharmaceuticals - Two sides of a coin ? (O XVIII B.1) <i>L. Müller (Germany)</i>
6.00pm-6.30pm	Photo safety testing of drug products (O XVIII B.4) <i>A. Jacobs (USA)</i>
6.30pm-7.00pm	Regulatory aspects of photomutagenicity in the European Union <i>N. Loprieno (Italy)</i>
8.30pm	CONGRESS DINNER

POSTER PRESENTATIONS

Sessions as on
Wednesday and
VIII, IX, XVI,
XVIII

- P VIII.1 Effects of cross-link frequency and chromosomal context on double-strand breaks induced during the repair of 8-methoxypsoralen-DNA photolesions in *Saccharomyces cerevisiae*
Michèle Dardalhon, Bernard de Massy, Alain Nicolas and Dietrich Averbeck
- P VIII.2 RecQ and recJ are required for processing disrupted replication forks in *E. coli*
Justin Courcelle and Philip Hanawalt
- P VIII.3 Protein-DNA interactions in homologous recombination: The effect of charge at position 207 of the L2 loop of RecA protein
Neil P. Johnson, Christophe Cazaux, Jean Sébastien Blanchet and Martine Defais
- P VIII.4 Rad9 checkpoint of *Saccharomyces cerevisiae* suppresses the DNA damage-associated stimulation of directed translocations, depending on the DNA damage agent
Michael Fasullo, Thomas Bennett, Joe Koudelik and Peter AhChing
- P VIII.5 Genomic instability by mutant p53 leading to allelic loss and translocation via illegitimate recombination
Masamitsu Honma, Li-Shi Zhang, Makoto Hayashi, Kenji Takeshita, Yuzuki Nakagawa, Noriho Tanaka and Toshio Sofuni
- P VIII.6 Gene transfection in mammalian cells: an evaluation of the potential mutagenic effects
Paola Vagnarelli, Elena Raimondi, Stefano Castagna, Sabrina Fiori and Liugi De Carli
- P VIII.7 DNA repair in radioadapted human lymphocytes
M. Wojewodzka, J. Zaim, G.P. Van der Schans, M. Kruszewski and I. Szumiel
- P VIII.8 Recombinogenic effects may diverge depending on different recombination mechanisms
Thomas Helleday and Dag Janssen
- P VIII.9 Non-induced excision of the transposable element B104 after chemical treatment in white insertional mutants of *drosophila melanogaster*
Smlvia Soriano, Antonia Velazquez, Ricardo Marcos, Oriol Cabri and Noel Xamena
- P VIII.10 Antimetabolites of DNA synthesis are mutagenic and recombinagenic as shown by the wing spot test of *drosophila*
Hansjörg Frei and Friedrich E. Würgler
- P VIII.11 High recombinogenicity of aflatoxin in yeast may indicate a mechanism for genetic changes in aflatoxin-induced hepatocarcinomas
Christian Sengstag, Bea Weibel and Michael Fasullo
- P VIII.12 Minisatellite rearrangement induced by a tumor promoter, okadaic acid
Minako Nagao, Shigeto Kaneko, Hiroshi Imai, Hirokazu Fukuda, Takashi Sugimura and Hitoshi Nakagama
- P VIII.13 Mutagenicity of thermal decomposition products of poly(vinyl chloride) and polycyclic aromatic hydrocarbons formation by them
Yoshiharu Hisamatsu, Satoshi Takarada and Hisao Hidaka
- P VIII.14 *S. pombe* rad32 protein: A phosphoprotein required for mating type switching
Manoochehr Tavassoli and Felicity Z. Watts

P VIII.15	Inhibitory effect of sequence divergence on recombination: analysis of the genetic control in the yeast <i>Saccharomyces cerevisiae</i> <i>E. Coïc and F. Fabre</i>
P VIII.16	High affinity of recombination proteins for microsatellite sequences (CA/GT) _n inhibits strand-exchange <i>E. Biet, C.-C. Gendrel and M. Dutreix</i>
P VIII.17	Mitotic crossing-over interfere the effect of aneuploidogenis in <i>Drosophila melanogaster</i> <i>A. Muñoz and P. Ramos-Morales</i>
P VIII.18	Ectopic conjugation of chromosome heterochromatic regions as cytological mechanism of instability <i>Margarita Monakhova</i>
P VIII.19	Meiotic instability of the human minisatellite CEB1 in yeast <i>Hélène Debrauwère, Jérôme Buard, Dominique Aubert, Gilles Vergnaud and Alain Nicolas</i>
SESSION IX: RADIATION SENSITIVITY, RECOMBINATION AND REPAIR	
P IX.1	The <i>rad18</i> gene from <i>Schizosaccharomyces pombe</i> : A novel essential gene involved in DNA repair <i>Maria Fousteri and Alan Lehmann</i>
P IX.2	Expression of Rad51 in human cells <i>Jenny Flygare, Solweig Orsan and Dennis Hellgren</i>
P IX.3	Role of the hamster Rad51 protein in DNA damage response and homologous recombination <i>Stéphane Vispé, Christophe Cazaux, Claire Lesca, Brigitte Raynaud, Michèle Garès and Martine Defais</i>
P IX.4	Ectopic expression of Mm Kin17 protein dramatically disrupts the cellular integrity of stably transfected-HEK 293 cells <i>D.S.F. Biard, L. Peres, P. Kannouche and J.F. Angulo</i>
P IX.5	Variation of radiosensitivity and dsb repair does not correlate with the Ku70/80 and DNA-PK activity in normal human fibroblasts <i>Ursula Kasten, Ekkehard Dikomey, Jørgen Johansen and Jens Overgaard</i>
P IX.6	Negative regulation of DNA-dependent protein kinase activity in human normal peripheral blood lymphocytes: Expression of a variant form of the Ku 86 protein <i>Catherine Muller, Caroline Dusseau, Patrick Calsou and Bernard Salles</i>
P IX.7	X-ray-sensitive Chinese hamster ovary cell mutants, XR-C1 and XR-C2, are defective in the SCID/DNA-PKcs gene, but only XR-C1 is complemented by human chromosome 8 <i>Margaret Z. Zdzienicka, Ab. Errami, Anna A. Friedl, Wilhelmina J.I. Overkamp, Bruno Morolli, Friedrike Eckardt-Schupp, Paul H.M. Lohman and Steven P. Jackson</i>
P IX.8	Induction of recombination in DNA repair disorders and chromosomal aberrations in hereditary cancer-prone syndromes <i>P.J. Abrahams, A. Houweling, F. Darroudi, C.M. Meijers, C. Terleth, A.J. van der Eb and A.T. Natarajan</i>
P IX.9	Molecular analyses of ionizing radiation-induced specific-locus mutations in mammalian cells <i>Abraham W. Hsie and Jeffrey L. Schwartz</i>

P IX.10	Induction and rejoining of DNA single - and double - strand breaks in normal and DNA ligase deficient cells <i>Silvano Nocentini</i>
P IX.11	Limited incision of DNA lesions induced by UV in rat testicular cells <i>Ann-Karin Olsen, Gunnar Brunborg, Jan K. Hongslo, Lena M. Jensen and Jørn A. Holme</i>
P IX.12	Radiosensitivity study in lymphocyte cultures from hospital workers occupationally exposed to low levels of ionizing radiation <i>P. Peitl Jr., T. Ghilardi-Neto and E.T. Sakamoto-Hojo</i>
P IX.13	The frequencies of micronucleated polychromatic erythrocytes in mouse bone marrow induced by combined radiation-burn injury <i>Lin Ao, Jia Cao, Tianmin Cheng, Lujun Yang, Shengxue Liu and Ping Qian</i>
P IX.14	Preliminary study of detection of excision-repairable DNA lesions with cytosine arabinoside-cytokinesis-block micronucleus test (ARA-CBMNT) <i>Lujun Yang, Jia Cao, Tianmin Cheng, Shengxue Liu and Lin Ao</i>
P IX.15	Chlamydomonas reinhardtii as a model system for DNA repair study <i>Daniel Vlcek, Andrea Slivkova, Svetlana Podstavkova, Eva Miadokova and Viera Wlckova</i>
P IX.16	Characterization of an Arabidopsis thaliana homologue of the human ATM gene <i>Alain Tissier</i>
P IX.17	Homologous recombination in CHO cell lines defective in DNA damage processing <i>M. Kruszewski, H. Kruszewska, H. Inaba, P. Jeggo and I. Szumiel</i>
P IX.18	Differential sensitivity to radiation induced apoptosis in normal and malignant human lymphocytes <i>Jozo Delic, Peggy Masdehors, Satoshi ömura, Jeanine Dumont, Jacques-Louis Binet, Jean-Marc Cosset and Henri Magdelénat</i>
P IX.19	Evidence for an inducible repair-recombination system in the female germ line and soma of <i>Drosophila melanogaster</i> <i>Judith Ducau, Anne Laurençon and Jean-Claude Bregliano</i>
P IX.20	Drosophila mei-41 gene, a model for ATM human gene <i>A. Laurençon, J. Sekelsky and S. Hawley</i>
P IX.21	Occupational exposure to low and elevated doses of ionizing radiation induce an adaptive response in human lymphocyte cultures <i>Ola El Habit, Abla Sharaf, Hamed Roushd and Hany Saber</i>
P IX.22	Repair of γ -ray induced double-strand breaks in Chinese hamster ovary cells. Involvement of DNA fragments of different sizes <i>Nathalie Bidon, Georges Noel and Dietrich Averbeck</i>
P IX.23	Genetic predictors of radiosensitivity in human colorectal tumor cells <i>Jerry R. Williams</i>
P IX.24	The fidelity of DNA double strand break (DSB) processing is impaired in Fanconi anemia cells <i>Monica Escarceller, Solange Rousset, Ethel Moustacchi and Dora Papadopoulo</i>
P IX.25	Unusual recombinational features of Fanconi anemia cells <i>Julianne Smith, Jean-Christophe Andrau, Noëlle Doyen, Agnès Laquerbe, Ethel Moustacchi and Dora Papadopoulo</i>

P IX.26	Role of DNA repair synthesis in mammalian DNA double strand break repair <i>Helmut Pospiech and Juhani Syväöja</i>
P IX.27	Putative role of the SRS2 halicase in the control of homologous recombination in yeast <i>Francis Fabre and Serge Gangloff</i>
P IX.28	Sporulation defect in <i>TOP3</i> mutants results from abnormal premeiotic DNA synthesis and absence of reductional segregation <i>Serge Gangloff, Bernard de Massy, Lane Arthur and Rodney Rothstein</i>
SESSION XVI: DNA ADDUCTS AND HUMAN CANCERS	
A. Biomonitoring	
P XVI A.1	Selection for p53 mutations <i>S. Rodin, G.P. Holmquist and A. Rodin</i>
P XVI A.2	Accelerator mass spectrometry - A new tool for carcinogen/mutagen risk assessment <i>R.C. Garner, B. Cupid, D. Russell, S.J. Gant, S.H. Leveson, R.J. Mauthe, K.H. Dingley, J.S. Vogel, S.P.H.T. Freeman and K.W. Turteltaub</i>
P XVI A.3	Formation of alkyl- and hydroxyl-guanine adducts in DNA and mutation induction caused by N-nitrosodialkylamine plus UVA <i>Sakae Arimoto-Kobayashi, Keiko Kaji, Gavain M.A. Sweetman, Peter B. Farmer and Hikoya Hayatsu</i>
P XVI A.4	Comparison of O ⁶ alkylguanine-DNA alkyltransferase activity in inbred mice after N-nitrosodiethylamine treatment <i>Victor Oreffo, Rajinder Singh and Peter Farmer</i>
P XVI A.5	Comparison of the O-alkyl adduct formation and the mutagenicity induced by NDMA and NDEA in Drosophila <i>Yuki Goto, Tomoko Matsuda, Kazuo Ito, Num-hoh Huh, Jürgen Thomale, Manfred F. Rajewsky, Hikoya Hayatsu and Tomoe Negishi</i>
P XVI A.6	Analysis of carcinogenic heterocyclic amine-DNA adducts in human tissues <i>Yukari Totsuka, Ken-ichiro Matsumoto, Masahiko Watanabe, Takashi Sugimura and Keiji Wakabayashi</i>
P XVI A.7	<i>In vitro</i> DNA and nucleotides adducts formation caused by ochratoxin A <i>Sophie Obrecht-Pflumio and Guy Dirheimer</i>
P XVI A.8	High benzo[a]pyrene diol-epoxide DNA adduct levels in lung and blood cells from subjects with combined <i>CYP1A1 MspI/MspI-GSTM1 *0/*0</i> genotypes <i>Margarita Rojas, Kroum Alexandrov, Ingolf Cascorbi, Jürgen Brockmöller, Alexei Likhachev, Guy Bouvier, Guy Aubertin, Lucienne Mayer, Ivar Roots and Helmut Bartsch</i>
P XVI A.9	Measuring dG-C8-PhIP as a biomarker of PhIP activation <i>Sarah J. Crosbie, Stephen Murray, Graham W. Taylor, Alan R. Boobis and Nigel J. Gooderham</i>
P XVI A.10	The DNA and protein binding properties of α-acetoxytamoxifen <i>Karen Brown, John Brown, Robert Heydon, Peter Farmer, Ian White and Elizabeth Martin</i>
P XVI A.11	Molecular dosimetry of propylene oxide in rat <i>Kamila Plna and Dan Segerbäck</i>

P XVI A.12	Use of alkaline comet assay to detect DNA damages in mononuclear leukocytes of farmers occupationally exposed to pesticides <i>P. Lebailly, C. Vigreux, T. Godard, E. Deslandes, F. Sichel, J.Y. Le Talaer, M. Henry-Amar and P. Gauduchon</i>
P XVI A.13	Evidence that DNA adducts in some human kidney tumours in France are related to ochratoxin A <i>Brigitte Azémar, Eric Pinelli, Geneviève Escourrou, Pierre Plante and Annie Pfohl-Leszowicz</i>
P XVI A.14	Biomonitoring of farmers acutely exposed to pesticides <i>Véronique André, Edwige Deslandes, Pierre Lebailly, Pascal Gauduchon, Odette Perin and François Perin</i>
P XVI A.15	Use of <i>Tradescantia</i> -bioassays to detect the genotoxicity of pH-unmodified environmental samples <i>Christina Pickl, Anette Fomin and Albrecht Paschke</i>
P XVI A.16	DNA adducts, expression of cytochrome P450 (CYP) and glutathione S-transferase (GST) and GSTM1/GSTP1 polymorphisms in broncho-alveolar macrophages of smokers and non-smokers <i>K. Savela, R. Piipari, A. Hirvonen, J.D. Hayes and S. Antilla</i>
P XVI A.17	Frequencies of hprt mutant lymphocytes in marijuana smokers and multi-drug users <i>Marinel Ammenheuser, Abbey Berenson, Chantele Singleton, Darlene Hastings, Elbert Whorton, Jr. and Jonathan Ward, Jr.</i>
P XVI A.18	Urinary levels 1-hydroxypyrene, micronuclei and SCE levels in white blood cells of traffic police wardens and referent subjects <i>Franco Merlo, Claudia Bolognesi, Ashild Andreassen, Aage Haugen, Federico Valerio and Angelo Abbondandolo</i>
P XVI A.19	Chromosomal aberrations analysis in a Brazilian population exposed to pesticides <i>Gilmara A. Antonucci and Ilce M. de S. Colus</i>
P XVI A.20	Genotoxic studies in occupationally coal exposed population <i>K. Rudrama Devi and V. Vijendar Reddy</i>
B. Molecular epidemiology	
P XVI B.1	A high frequency of chromosomal aberrations in peripheral blood lymphocytes in healthy subjects predicts cancer <i>Stefano Bonassi, Lars Hagmar, Christina Reuterwall and European Study Group of Cytogenetic Biomarkers and Health (ESCH)</i>
P XVI B.2	Cytogenetic analysis of peripheral lymphocytes in health personnel by means of fish <i>Silvia Kucharova, Miluse Jurakova, Petra Musilova, Zdena Zudova and Jiri Rubes</i>
P XVI B.3	Transgenic drosophila melanogaster bearing human genes in environmental risk evaluation <i>Karel Chroust, Trevor Jowett and Iva Papoušková</i>
P XVI B.4	O ⁶ -methylguanine is a ubiquitous lesion in human DNA <i>P. Georgiadis, S. Kaila, E. Samoli, K. Katsouyanni and S.A. Kyrtopoulos</i>
P XVI B.5	A molecular epidemiological study of genetic susceptibility to lung cancer <i>Sarah Lewis, Robert Niven, Nicola Cherry, Philip Barber, Donald Cooper and Andrew Povey</i>

P XVI B.6	Occupational exposure to mutagens; monitoring of rubber factory workers <i>Maria Duinska, Radoslav Fabry, Elena Szabova, Martina Somorovska, Helena Petrovska and Andrew Collins</i>
P XVI B.7	P53 mutational spectra in lung and bladder cancers. A study of urban bus drivers and a reference group <i>Lise R. Nielsen, Grete K. Jacobsen, Helle Soll-Johanning, Birgitte Korsholm, Lourdes M. Pedersen, Lisbeth E. Knudsen, Otto M. Poulsen, Haakan Wallin and Bjørn A. Nexo</i>
P XVI B.8	Immunohistochemical detection of PAH-DNA adducts. An application in molecular epidemiology studies <i>Grazyna Motykieicz, Ewa Malusecka, Paula T.M. Van Den Berg, Jadwiga Michalska, Robert A. Baan, Regina M. Santella and Mieczyslaw Chorazy</i>
P XVI B.9	DNA adduct formation by tamoxifen and structurally related compounds in rat liver <i>Heli Rajaniemi, Eero Mäntylä and Kari Hemminki</i>
P XVI B.10	Risk assessment of some traditional food items consumed in areas with high risk of esophageal cancer in north of Iran <i>Abed-Ali Zia'ee, Zahra Pourmahdi and Ferdous Rastgar-Jazii</i>
P XVI B.11	Towards molecular epidemiology of Myelodysplastic Syndromes (MDS) <i>Irena Tallon, Nik Van Larebeke and Joris Deman</i>
P XVI B.12	In vivo DNA binding of the active metabolites of 1,3-butadiene <i>Pertti Koivisto, Francesca Pacchierotti, Ilse-Dore Adler and Kimmo Peltonen</i>
P XVI B.13	Immunohistochemical detection of PAH-DNA adducts. An application in molecular epidemiology studies <i>Gragyna Motykieicz, Ewa Mawusecka, Paula T.M. Van den Berg, Jadwiga Michalska, Robert A. Baan, Regina M. Santella and Mieczyslaw Chorazy</i>
P XVI B.14	Genotoxic damage in Danish busdrivers <i>L.E. Knudsen</i>
SESSION XVIII: BIOLOGICAL CONSEQUENCES OF SUN EXPOSURE	
A. Photomutagenicity and photocarcinogenicity: experimental aspects	
P XVIII.1	Induction of UV photoproducts and DNA damage by solar simulator UV irradiation <i>Alison Wolfreys, Peter Clingen and Leigh Henderson</i>
P XVIII.2	Delayed cell death in cell lines from humans and fish exposed to UVA and UVB <i>Joseph P. O'Reilly and Carmel Mothersill</i>
P XVIII.3	Mutagenicity induced by UVA-irradiation on Drosophila <i>Shogo Takinami, Miwako Hieda, Kotaro Hieda, Mamoru Kubota, Masakatsu Watanabe, Osamu Nikaido, Hikoya Hayatsu and Tomoe Negishi</i>
P XVIII.4	Environmental and genetic risk factors in the development of basal cell carcinomas <i>Mariarosaria D'Errico, Angelo Calcagnile, Francesco Sera, Rosamaria Corona and Eugenia Dogliotti</i>
P XVIII.5	Is there a link between sunlight and non-hodgkin lymphoma (NHL)? <i>Michael H.L. Green, Colin F. Arlett, Graham Bentham, Gino Cortopassi, Yafei Liu, Hedda Steingrimsdottir, Emily Capulas and Jane Cole</i>
P XVIII.6	Evaluation of the genoprotective effect of mineral sunscreen: <i>In vitro</i> comet assay <i>Caroline Cayrol-Baudouin, Danièle Raynal, Marie-Françoise Ariès, Marie Charveron and Y. Gall</i>

- P XVIII.7 Repair of UV-induced lesions in plants
V. Naumenko, N. Clarke, S. McCready, T. Thomas, D. Grodzinsky and I. Boubriak
- P XVIII.8 In vitro strategy to predicting phototoxicity induced by simulated solar UV at the cellular and molecular level: Application to photoprotection
C. Agapakis-Causse
- P XVIII.9 Photoreactivation by sunlight of UVC-induced damages in ages in crepis capillaris cells
Nijole Tiunaitiene, Kazimiera Sleyte and Karolis Cieminis
- P XVIII.10 In vitro evaluation of solar UV genotoxicity: Photoprotection by the sunscreen MEXORYL^R
SX
L. Marrot

FRIDAY SEPTEMBER 12 1997

8.30am-10.00am	AMPHI A	Plenary Session Chair : J. Parry (UK) and E. Lorge (France) The news in mutagenicity testing (PL 2) <i>J. Ashby (UK)</i> Monitoring the genetic effects of radiation in the children of atomic bomb survivors (PL 9) <i>C. Satoh (Japan)</i>
8.30am-9.15am		
9.15am-10.00am		
10.00am-10.30am	AMPHI A	COFFEE BREAK
10.30am-12.30pm		Role of oxidative damage, mutagens and antimutagens in relation to nutrition Session XVII A Chair : P. Karran (UK) and M. Vuillaume (France) A) Repair and mutagenesis of oxidative damage Enzymes for repair of abasic damages : regulation and specificity (O XVII A.1) <i>B. Demple (USA)</i> Mutagenesis and carcinogenesis induced by oxygen radicals : roles of 8-hydroxyguanine, 2-hydroxyadenine, and glyoxal formation (O XVII A.2) <i>H. Kasai (Japan)</i> Repair of oxidatively damaged bases in eukaryotes (O XVII A.3) <i>S. Boiteux (France)</i> Defects in transcription-coupled repair of oxidative base damage in xeroderma pigmentosum with cockayne syndrome <i>P. K. Cooper (USA)</i> New mutagenicity tests and their evaluation - Session XIV A/B Chair : M. Green (UK) and M. De Méo (France) A) <i>In vitro</i> tests for NER and recombinational repair and mutagenesis DNA damage and repair at the level of the nucleotide : a novel approach and a model system (O XIV A.1) <i>R. Waters (UK)</i> <i>In vitro</i> assays to measure homologous recombination and homologous pairing in crude extracts (O XIV A.2) <i>B. Lopez (France)</i> B) Comet assay The SCG/Comet assay : Applications to environmental and human biomonitoring (O XIV B.2) <i>R. R. Tice (USA)</i> The Comet assay as a surrogate endpoint for cell killing by DNA damaging agents (O XIV B.1) <i>P. L. Olive (Canada)</i> Comet assay - Application to human epithelial cells from the upper aerodigestive tract (O XIV B.3) <i>P. Schmezer (Germany)</i>
10.30amm-11.00am	AMPHI B	
11.00am-11.30am		
11.30am-12.00pm		
12.00pm-12.30pm		
10.30am-1.00pm	AMPHI B	
10.30am-11.00am		
11.00am-11.30am		
11.30am-12.00pm		
12.00pm-12.30pm		
12.30pm-1.00pm		
10.30am-12.30pm	AMPHI C	WORKSHOP - Session XX Genotoxic damage in the European Population ? Chair : H. Autrup (Denmark) and C. Pueyo (Spain) Overview of results from EU collaborative studies <i>H. Autrup (Denmark)</i> Aneuploidy in human population in Hungary <i>I.-D. Adler (Germany)</i> Genetic damage in a population in Northern Bohemia <i>R. Sram (Czech Republic)</i> Genotoxic damage in Danish bus drivers <i>L. Knudsen (Denmark)</i> Biological monitoring of workers exposed to emissions from petroleum plants <i>A. Cebulaka-Waslewskia (Poland)</i> Chromosomal damage following the Chernobyl accidents <i>I. Vorobtsova (Russian Federation)</i> Exposure assessment of carcinogens in an Estonian oil-shale plant <i>K. Peltonen (Finland)</i> Discussion MEAL
10.30am-10.45am		
10.45am-11.00am		
11.00am-11.15am		
11.15am-11.30am		
11.30am-11.45am		
11.45am-12.00pm		
12.00pm-12.15pm		
12.15pm-12.45pm		
12.30pm-2.00pm		

2.00pm-3.00pm

POSTER PRESENTATIONS (Sessions XIV-XVII)

AMPHI A

3.00pm-4.30pm

Role of oxidative damage, mutagens and antimutagens in relation to nutrition

Session XVII B

Chair : F. Palitti (Italy) and C. Beaubestre (France)

B) Mutagens and antimutagens in the environment

Chemoprevention of mutation-related chronic degenerative diseases. Molecular mechanisms

(O XVII B.1)

S. de Flora (Italy)

Determination of endogenous DNA damage, oxidized DNA bases and oxidative stress in primary human colon cells and modulation by plant ingredients (O XVII B.2)

B. L. Pool-Zobel (Germany)

Mutagens of polycyclic structures - Detection and prevention (O XVII B.3)

H. Hayatsu (Japan)

AMPHI B

3.00pm-5.00pm

New mutagenicity tests and their evaluation - Session XIV C

Chair : S. Albertini (Switzerland) and N. Bichet (France)

C) Aneuploidy and chromosome painting

The use of chromosome painting for detecting adverse environmental exposure (O XIV C.4)

J. D. Tucker (USA)

Multiple genetic endpoint comparisons in various tissues and cells of the rat (O XIV C.3)

G. R. Mohn (The Netherlands)

Chemically induced germ cell aneuploidy detected in sperm by fluorescence *in situ* hybridization (FISH)

(O XIV C.2)

I. D. Adler (Germany)

The *in vitro* micronucleus test : A multi-endpoint test for the detection of apoptosis, chromosome breakage, chromosome loss and non-disjunction (O XIV C.1)

M. Kirsch-Volders (Belgium)

AMPHI A

5.00pm-6.00pm

"Mutagenesis" Poster Award (J. Parry)

CONCLUDING REMARKS

Chair : B. Salles (France)

Environmental mutagenesis, which future ?

E. Moustacchi (France)

POSTER PRESENTATIONS

Sessions XIV, XVII

- SESSION XIV: NEW MUTAGENICITY TESTS AND THEIR EVALUATION
- A. In vitro tests for NER and recombinational repair and mutagenesis
- P XIV A.1 Detecting polyploidy in regulatory in vitro cytogenetics assays
Clare Bourner, Alison Wolfreys and Leigh Henderson
- P XIV A.2 Salmonella spiral assay: Manually counting and data analysis
Lone Lillemark, Mona-Lise Binderup, Birgitte Plesing Møller and Vivian Jørgensen
- P XIV A.3 Detection of genomic DNA damage induced by genotoxins in mammalian cell lines by a chemiluminescence microplate DNA repair assay
R.-Y. Li, C. Provot, J.-P. Jaeg, C. Bozzato and B. Salles
- P XIV A.4 Evaluation of the restriction site mutation assay using murine P53 intron sequences
Gareth J.S. Jenkins and James M. Parry
- P XIV A.5 Metabolic activation of promutagenic carcinogens with human hepatoma (Hep G2) cells
F. Darroudi, S. Knasmüller, R. Sanyal, C.M. Meijers and A.T. Natarajan
- P XIV A.6 Mutagenic action of mycotoxins at molecular level
Marcela Aranda and Manuel Ellahueñe
- P XIV A.7 Comparison of sensitivity and utility of tolC (mtcB) deep rough like mutant of E. coli WP2 tester strains and WP2 tester strains
Akihiro Araki, Rie Ishida, Toshiaki Sasaki and Taijiro Matsushima
- P XIV A.8 An evaluation of spontaneous mutation in the environment
Samantha Mead and Susan M. Thomas
- P XIV A.9 Bioluminescent detection of DNA damage via *umuC'-luxAB* gene fusion
Tamara Justus and Susan M. Thomas
- P XIV A.10 Detection of mitomycin C in vitro effects by DNA fingerprinting on rainbow trout cells
Concepcion Becerril, Mar Ferrero and Argelia Castaño
- P XIV A.11 Assessment of DNA damage in patients with leukemia in individual peripheral blood and bone-marrow cells using the single cell gel electrophoresis assay
A. Gabelova, O. Babusikova, Ruzekova, T. Farkasova and D. Slamenova
- P XIV A.12 Cytogenetic end-point in an alternative medium-term carcinogenicity assay
Daisy Salvadori, Roberta Denadai, João L.V. de Camargo and Lucia R. Ribeiro
- P XIV A.13 *In vivo* evaluation of cocaine genotoxicity
Susie V. Oliveira, Roberta Denadai, Ana Paula Bazo, Daisy M.F. Salvadori, Efigénia Q. Santana, João L.V. de Camargo and Lucia R. Ribeiro
- P XIV A.14 Initiated rat bioassay as an alternative method for carcinogenicity evaluation adopted in Brazil
João L.V. de Camargo, Daisy M.F. Salvadori and Lucia R. Ribeiro
- P XIV A.15 Natural killer activity after initiation and promotion in an alternative medium term carcinogenicity bioassay
Ana L.T. Spinardi, Ramon Kaneno, Daisy M.F. Salvadori, Lucia R. Ribeiro and João L.V. de Camargo

	B. Comet assay
P XIV B.1	Molecular dosimetry of cancer risk factors <i>B. Nagarajan and V.M. Vadhanam</i>
P XIV B.2	DNA damage in smokers' lymphocytes <i>Stylianos Piperakis, Evangelos Visvardis and Aspasia Tassiou</i>
P XIV B.3	Evaluation of the genotoxic effect of 2-ethoxyethanol <i>Claudia Roncancio and Bertha O. de Dulce</i>
P XIV B.4	Detection of primary DNA damage in an unicellular protozoa <i>Acanthamoeba castellanii</i> by a modified test protocol of the comet assay - investigations of humic substances and their interaction with genotoxins <i>Adelheid Weßler, Peter Krolla-Sidenstein and Ursula Obst</i>
P XIV B.5	The use of the alkaline comet assay to detect DNA crosslinks: Improved methodology <i>Stefan Pföhler, Sieglinde Deutschenbaur and Hans-Uwe Wolf</i>
P XIV B.6	DNA damage induced by different agents in various cell types <i>Helena Petrovska, Maria Duinska, Martina Somorovska and Andrew Collins</i>
P XIV B.7	Mutagenic and antimutagenic effects of cobalt compounds measured by the comet assay <i>Marlies De Boeck, Mia Saaristo, Freddy Van Goethem and Micheline Kirsch-Volders</i>
P XIV B.8	Genetic effects in neocortical cells of rats transplacentally exposed to mercury compounds <i>Geofrey De Visscher, Magdolna Szente and Micheline Kirsch-Volders</i>
P XIV B.9	Use of the comet assay and the micronucleus test in fish for biomonitoring of the aquatic environment <i>Kathy Belpaeme, Kris Cooreman and Micheline Kirsch-Volders</i>
P XIV B.10	Use of comet assay and alkaline DNA unwinding to detect DNA lesion in mammalian cells damaged by indirect carcinogens <i>D. Slamenova, A. Gabelova and L. Ruzekova</i>
P XIV B.11	<i>In-vivo</i> detection of genotoxic effects on cells of various rat organs with the single cell gel electrophoresis assay: Comparison with <i>in vitro</i> effects on CHO cells and <i>in vivo</i> micronucleus test in mice <i>Thierry Godard, Adel Ben Youssef, Virginie Klès, Jean-Michel Poul, Pierre Lebailly, Carole Vigreux, Edwige Deslandes, Cathy Staedel, François Sichel and Pascal Gauduchon</i>
P XIV B.12	Detection of staurosporine- and etoposide-induced apoptosis on CHO cells with the comet assay <i>T. Godard, L. Poulin, E. Deslandes, C. Vigreux, P. Lebailly, F. Duigou, C. Staedel, A. Ben Youssef, J.M. Poul, F. Sichel and P. Gauduchon</i>
P XIV B.13	The comet assay: Alternatives for quantitative analyses <i>Ralph E. Durand and Peggy L. Olive</i>
P XIV B.14	The experimental design and statistical analysis of <i>in vivo</i> and <i>in vitro</i> comet studies <i>David P. Lovell and Gail Thomas</i>
P XIV B.15	Protective effect of α -Hederine against B[a]P by comet assay and flow cytometry <i>Hélène Guiraud-Dauriac, Clémence Mba Gachou, Michèle Laget, Michel De Méo and Gérard Duménil</i>
P XIV B.16	DNA damage induction and removal after cyclophosphamide treatment in different organs of transgenic mice <i>Elisa Garcia Garayoa, Franziska Locher, Hans-Jörg Martus and Willi Suter</i>

P XIV B.17	The use of the comet assay in an unicellular green alga for the assessment of genotoxic potential and masking effects of humic substances <i>Monika Erbes, Adelheid Weßler and Ursula Obst</i>
P XIV B.18	Detection of direct-acting genotoxins in the in vivo skin comet assay <i>Helen Tinwell, James Mackay, Barry Elliott and John Ashby</i>
P XIV B.19	Comparison between the alkaline single-cell gel (comet) assay and the micronuclei test in mice treated with different doses of methyl methanesulfonate <i>Manuel Ellahueñe, Fabio Dalessandro, Patricio Gonzalez-Hormazabal, Mauricio Farfan, Margarita Orellana-Valdebenito and L. Patricia Pérez-Alzola</i>
P XIV B.20	DNA damaging activity of hydroquinone in human white blood cells as detected by the comet assay <i>Cristina Andreoli, Sabrina Rossi, Francesca Marcon and Riccardo Crebelli</i>
P XIV B.21	Impaired DNA repair as assessed by the «Comet» assay in patients with thyroid carcinoma after radiotherapy <i>Frédéric Leprat, Claire Alapetite, Filippo Rosselli, Agnès Ridet, Martin Schlumberger, Alain Sarasin, Horacio Suarez and Ethel Moustacchi</i>
P XIV B.22	Comparison of effects induced in vivo by carbon tetrachloride, 1-ethyl-1-nitrosourea and methyl methanesulfonate using the alkaline comet assay <i>Eva Agurell, Ann-Marie Hamreby, Jeanette Lind, Maud Palm, Gunilla Rylander and Annmarie Westman</i>
P XIV B.23	<i>In vivo</i> genotoxicity of two organ-specific carcinogenic haloalkanes in the comet assay <i>C. Eckert, P. Schmezer, U.M. Liegibel, R.G. Klein, R. Gliniorz and H. Bartsch</i>
P XIV B.24	Genotoxic aldehydes produce specific comet assay images <i>F. Kuchenmeister, G. Engelhardt, P. Schmezer and H. Bartsch</i>
P XIV B.25	Immunofluorescent detection of cyclobutane pyrimidine dimers by a modification of the Comet assay <i>Sylvie Sauvage, Nathalie Signorini, Nathalie Emonet, Marie-Jeanne Richard and Jean Cadet</i>
	C. Aneuploidy and chromosome painting
P XIV C.1	Comparison of vinblastine-induced micronuclei chromosome malsegregation in binucleated lymphocytes from young and elderly individuals <i>Paola Leopardi, Francesca Marcon, Gabriella Dobrowolny, Riccardo Crebelli and Andrea Zijno</i>
P XIV C.2	Immunofluorescence analysis of Diazepam-induced mitotic apparatus abnormalities and chromosome loss in Chinese hamster cells <i>Massimo Izzo, Antonio Antoccia, Francesca Degrassi and Caterina Tanzarella</i>
P XIV C.3	Analysis of radiation-induced chromosome aberrations in Chinese hamster splenocytes by FISH using chromosome-specific DNA libraries <i>M. Grigorova, Y. Xiao and A.T. Natarajan</i>
P XIV C.4	Analysis of mutagenic effect of low frequency electromagnetic fields by chromosome painting <i>Jose M. Garcia-Sagredo, Concepcion Villalon, Isabel Vallcorba, Carmen Sanchez-Hombre, Teresa Ferro and Carlos San Roman</i>
P XIV C.5	Development of arm-specific painting probes for Chinese hamster chromosomes and their use in the detection of complex chromosome rearrangements induced by bleomycin <i>F. Darroudi, S. Simi and A.T. Natarajan</i>

P XIV C.6	Analysis of the induction and the persistence of X-ray induced chromosome aberrations in mouse bone marrow cells using fluorescence <i>in situ</i> hybridization <i>Y. Xiao, F. Darroudi, M. Grigorova and A.T. Natarajan</i>
P XIV C.7	Validation of multi-color FISH methods for the detection of chromosome abnormalities in human and rodent sperm <i>Andrew Wyrobek, Paul Van Hummelen, Francesco Marchetti, Jack Bishop and Xiu Lowe</i>
P XIV C.8	Study of proliferation of T-lymphocytes in CFS-patients <i>Sofie Van Impe, Inge Hauspie, Micheline Kirsch-Volders and Kenny De Meirlier</i>
P XIV C.9	Molecular characterization of micronuclei in peripheral blood reticulocytes of the mouse by means of an <i>in situ</i> RT-PCR/PRINS approach <i>Antonella Russo and Cristiano Salata</i>
P XIV C.10	Aneuploidy induction with chemicals determined in mouse sperm by multicolor FISH <i>Thomas E. Schmid, Andrew J. Wyrobek, Adolf Baumgartner and Ilse-Dore Adler</i>
P XIV C.11	Characterization of chromosomal alterations occurring in B6C3F1 mice following benzene exposure using fluorescence <i>in situ</i> hybridization (FISH) <i>Maik Schuler, Ling Wang, Christopher Frantz, Robert Parks and David A. Eastmond</i>
P XIV C.12	Radioactive iodine induces clastogenic and age-dependent aneugenic effects in exposed patients as detected by interphase FISH <i>Maria Jose Ramirez, Jordi Surralles, Pere Galofre, Amadeu Creus and Ricard Marcos</i>
P XIV C.13	Interlaboratory comparison of different cytogenetic endpoints for scoring of radiation damage in peripheral blood lymphocytes after <i>in vitro</i> low dose γ -exposure <i>Hubert Thierens, Anne Vral, Leo De Ridder, Micheline Kirsch-Volders, Nadia Touil, Christian Laurent and Vincent Lambert</i>
P XIV C.14	Lagging of the X chromosome, autosomes, and acentric fragments in anaphases of female lymphocytes <i>Julia Catalan, Ghita Falck, Jordi Surrallés and Hannu Norrpa</i>
P XIV C.15	Liver micronucleus test of rats with direct and indirect mutagens <i>Tadashi Noguchi, Suzuki Masaaki, Keisuke Noda and Taijiro Matsushima</i>
P XIV C.16	Induction of nondisjunction and chromosome loss by three aneuploidogens in human binucleated lymphocytes <i>Lucia Migliore, Roberto Barsanti, Laura Zotti-Martelli and Roberto Scarpato</i>
P XIV C.17	Neocarzinostatin-induced chromosome translocations in human sperm and peripheral blood lymphocytes <i>Hirokazu Kusakabe, Kohji Yamakage and Noriho Tanaka</i>
P XIV C.18	Automation of scoring micronucleated reticulocytes by image analysis in the mouse peripheral blood micronucleus assay <i>Yoshiyuki Katsuma, Kazuhiko Matsunaga, Takayosi Suzuki, Toshio Sofuni, Norihide Asano, Hironobu Tamura, Naohiko Higashikuni and M. Hayashi</i>
P XIV C.19	Analysis of micronuclei in primary rat hepatocytes using fluorescence <i>in situ</i> hybridization with a centromeric DNA probe <i>Peter Kasper, Birgit Kersten, Kerstin Tegethoff, Renata Schleicher, Anne Wolbert and Lutz Müller</i>
P XIV C.20	Studies on the relationship between short-term genotoxic endpoints and carcinogenic effects <i>Jan van Benthem, Henny W. Verharen, Joyce M. de Stoppelaar, Barbara Hoebee and Georges R. Mohn</i>

P XIV C.21	Detection of aneuploidy in <i>in vivo</i> induced binucleated rat fibroblasts <i>Joyce M. De Stoppelaar, Harro Hokse, Henny W. Verharen, Georges R. Mohn, Barbara Hoebee and Jan van Benthem</i>
P XIV C.22	Indication of asymmetrical DNA distribution in treated and tumor cells by scanning Integrated Optical Density <i>Elena Gostjeva</i>
P XIV C.23	Detection of cytogenetic damages in blood cells of benzene-exposed workers by multicolor fluorescence <i>in situ</i> hybridization (FISH) <i>Francesca Marcon, Andrea Zijno, Riccardo Crebelli, Angelo Carere, Maik Schuler, Robert Parks and David A. Eastmond</i>
P XIV C.24	Analysis of origin of micronuclei induced by 4 suspect aneugens using fluorescent <i>in situ</i> hybridization (FISH) and antikinetochore antibodies staining (CREST) <i>Jia Cao, Bin Hu, Tianming Cheng and Ke Cheng</i>
P XIV C.25	Comparison of baseline aneuploidy frequencies in sperm of mice, rats and humans determined by fluorescence <i>in situ</i> hybridization with chromosome specific DNA point probes <i>Jack B. Bishop, Xiu Lowe, Joyce M. deStoppelaar, Barbara Hoebee and Andrew J. Wyrobek</i>
P XIV C.26	Chromosomal and structural abnormalities in human sperm detected by multicolor FISH after intoxication with diazepam: Comparison with mouse results <i>Adolf Baumgartner, Thomas E. Schmid, Andrew E. Czeizel, Andrew J. Wyrobek and Ilse-Dore Adler</i>
P XIV C.27	The flow cytometric <i>in vivo</i> micronucleus assay in mouse bone marrow and spleen. Detecting the effects of low doses of model agents <i>Jan Grawé, Lilianne Abramsson-Zetterberg and Gösta Zetterberg</i>
P XIV C.28	Studies of sister-chromatid exchanges and chromosome aberrations in cultured human peripheral blood lymphocytes treated with insulin <i>Ninoslav Djelic, Bogosav Soldatovic and Marko Andjelkovic</i>
P XIV C.29	The development of software on the cytokinesis-block micronuclei of human lymphocytes using image analysis system <i>Dong Yi and Jia Cao</i>
P XIV C.30	A methodological study on the detection of environmental mutagens using <i>Vicia faba</i> sister-chromatid exchange assay <i>Zhiming Kong, Yu Zang, Yiqiang Li and Enzhong Xia</i>
P XIV C.31	Induction of aneuploidy in human lymphocytes by alcohol abuse <i>Francesca Maffei, Carmela Fimognari, Giorgio Cantelli-Forti and Patrizia Hrelia</i>
P XIV C.32	Effect of cytochalasin B on the induction of chromosome missegregation by colchicine at low doses in human lymphocytes <i>Sandra Minissi, Bianca Gustavino, Francesca Degrassi, Caterina Tanzarella and Marco Rizzoni</i>
P XIV C. 33	Automated metaphase finding: Assessment of the metafer2 system in routine chromosomal aberration assays. <i>Andrée-Anne Chételat</i>
P XIV C. 34	Development of a test strategy for the detection of genotoxic effects in surface waters <i>Tamara Grummt, Heinz-Günter Wunderlich</i>

SESSION XVII: ROLE OF OXIDATIVE DAMAGE, MUTAGENS AND ANTIMUTAGENS IN RELATION TO NUTRITION

A. Repair and mutagenesis of oxidative damage

- P XVII A.1 Detection of oxidative mutagens with *Escherichia coli* strains deficient in the OxyR function:
Mutagenicity of the antituberculosis drug isoniazid
Manuel Blanco, Amparo Urios, Guadalupe Herrera and José E. O'Connor
- P XVII A.2 Oxidative DNA damage in *Escherichia coli* strains deficient in catalase and Fapy-glycosylase
José Alhama, Julia Ruiz, Carmen Pueyo and Juan Lopez-Barea
- P XVII A.3 Extracellular gamma-radiation-induced mutagenesis in the lacI gene
Karen Wijker, Natasja Wientjes and Vincent Lafleur
- P XVII A.4 Replication of DNA templates containing 5-formyluracil, a major oxidative lesion of thymine in DNA
Qiu-Mei Zhang, Hiroshi Sugiyama, Izumi Miyabe, Naoko Ishikawa and Shuji Yonei
- P XVII A.5 Influence of hydrogen peroxide on cell cycle in chosen cell lines
Elzbieta Anuszewska, Janusz Skierski, Jadwiga Koziorowska and Beata Gruber
- P XVII A.6 Development of a postlabeling assay as a biomonitor of oxidative DNA damage in humans
George Jones, Neil Bennett, Ian Podmore and Michael Routledge
- P XVII A.7 Steady-state levels of oxidative DNA base modifications in mammalian cells
Michael Pflaum, Olaf Will, André-Patrick Arrigo and Bernd Epe
- P XVII A.8 8-Oxoguanine: Mutagenesis and repair
Florence Le Page, Alain Gentil and Alain Sarasin
- P XVII A.9 A simple chemiluminescence microplate assay (the 3D-assay) to study antioxidantizing compounds
Christian Provot, Corinne Bozzato and Bernard Salles
- P XVII A.10 Sequence dependent repair of dimethylsulfate DNA adducts in the promoter and first exon of the PGK-1 gene in normal human cells and *in vitro*
Ning Ye, Gerald P. Holmquist and Timothy R. O'Connor
- P XVII A.11 Fish 8-oxo-dG levels as biomarker of oxidative damages by environmental pollutants
Isa Diaz-Méndez, José Alhama, Carmen Pueyo and Juan Lopez-Barea
- P XVII A.12 Urinary excretion of 8-hydroxydeoxyguanosine: Influence of smoking and vitamin status
Dietmar Germadnik, Alexander Pilger, Gerhard Scherer and Hugo Rüdiger
- P XVII A.13 *Ex vivo* and *in vitro* unscheduled DNA synthesis (UDS) assays in rat liver with hydrogen peroxide (H₂O₂)
J.-F. Régnier, C. Clare, J. de Gerlache, G. Malinverno, W. Mayr, M. Weiner and H. Trochimowicz
- P XVII A.14 Iron chelators that promote Fenton chemistry
Björn E. Sandström and Micael Granström
- P XVII A.15 Study of the effect of vitamin C in Down syndrome lymphocytes treated with H₂O₂ and α -irradiation using the SCGE assay - Is there a protective role?
Aspasia Tassiou, Evangelos-E. Visvardis and Stylianos Piperakis

P XVII A.16	Different responses of alveolar macrophages and epithelial type II cells to oxidative DNA damage caused by paraquat <i>Bibiana Vallova, Zuzana Kovaèikova and Maria Dusinska</i>
P XVII A.17	PBMC's repair capacity to oxidative DNA damage, relation to subpopulations' variation and activation of apoptosis <i>Evangelos-E. Visvardis, Aspasia Tassiou, C.N. Baxevanis, M. Papamichail and Stylianos Piperakis</i>
P XVII A.18	Phenolic molecules and the genotoxicity of instant coffee upon nitrosation <i>Maria Paula Duarte, Antonio Laires, Jorge Gaspar, Daniela Leão, José Santos Oliveira and J osé Rueff</i>
P XVII A.19	Mutagenicity evaluation of Genistein, an anti-carcinogenic isoflavone present in soybeans <i>Wolfgang Muster, Silvio Albertini, Andreé-Anne Chételat, Beate Miller and Elmar Gocke</i>
	B. Mutagens and antimutagens in the environment
P XVII B.1	Imidazole ring-opened purines They are weaker inhibitors of DNA replication than oxidative derivatives of pyrimidines <i>Maria-Anna Grziewicz, Tomasz H. Zastawny and Barbara Tudek</i>
P XVII B.2	Peroxidative hemolysis value as a predictive parameter for the revealing of human mutagenic risk groups <i>Ludmila Khrripach, Faena Ingel, Tatyana Tsutsman, Elena Krivtsova and Julia Revazova</i>
P XVII B.3	Vitamin C and bleomycin: A comparative study of their effects on smokers and non-smokers lymphocytes <i>Andréa Oliveira Cecchi and Catarina Satie Takahashi</i>
P XVII B.4	Moderate wine consumption protects against hydrogen peroxide-induced DNA damage <i>Michael Fenech, Creina Stockley and Clare Aitken</i>
P XVII B.5	Folate, vitamin B12, homocysteine and micronuclei in lymphocytes of older men <i>Michael F. Fenech, Ivor E. Dreosti and Josephine R. Rinaldi</i>
P XVII B.6	Formation of a coupled mutagenic compound from the co-mutagen, norharman with aniline <i>Keiji Wakabayashi, Yukari Totsuka, Noriyasu Hada, Masahiko Watanabe, Yusaku Yokoyama, Yasuoki Murakami and Takashi Sugimura</i>
P XVII B.7	Mutagenic properties of 7-methyladenine <i>Barbara Tudek</i>
P XVII B.8	Analysis of mutagenesis by human hepatitis B virus X protein <i>Yoshimitsu Oda, Yoshinobu Okuno and Yoshi-ichi Minekawa</i>
P XVII B.9	Effects of complex prescription Huang Qi (CPHQ) on life span in Drosophila melanogaster <i>Li Huaiyi, Wang Xinming, Tan Jianquan, Chu Zhengxu and Jiang Zuoshu</i>
P XVII B.10	Arsenite induces micronuclei by generation of nitric oxide <i>Kun-Yan Jan, Shugene Lynn and Jia-Ran Gurr</i>
P XVII B.11	Modulators of nitrosation reactions in human gastric juice <i>Eugénia Ramos, Jorge Gaspar, Maria Catela, Antonio Laires and José Rueff</i>
P XVII B.12	Enhancement of mutagenicity of N-nitrosodimethylamine (NDMA) by a modified microsomal/bacterial pre-incubation assay <i>Junko Ebata and Hideyuki Furukawa</i>

P XVII B.13	Interaction of fatty acids in mutagenicity <i>Thomas Helleday, Eva Martensson and Dag Janssen</i>
P XVII B.14	Cytotoxic and mutagenic effectiveness of food related α,β -unsaturated carbonyl compounds in mammalian cells <i>C. Janzowski, V. Glaab and G. Eisenbrand</i>
P XVII B.15	Peroxisomal enzyme activity and cell proliferation in rats, mice, and hamsters exposed for 13-weeks to Wy-14,643 and Gemfibrozil <i>Michael Cunningham, Joyce Durnford, Milton Hejmancik, Perry Kurtz, Roger Renne, Katherine Gideon, Dan Marsman, Molly Vallant and Raj Chhabra</i>
P XVII B.16	Preferential binding of heterocyclic amines to purines in polynucleotides <i>Hikoya Hayatsu, Yuji Tanaka and Toshiko Hayatsu</i>
P XVII B.17	Effects of benzenediols and benzenetriols on <i>N</i> -nitrosation reactions <i>Antonietta Martelli, Enzo Sottofattori and Giovanni Brambilla</i>
P XVII B.18	Mutagenicity of aqueous fecal extracts with <i>umu</i> test <i>Sei-ichi Nakamura, Hiroshi Kosaka, Yoshimitsu Oda, Hajime Oda, Shinichi Sato and Minoru Iida</i>
P XVII B.19	Mutagenicity of chlorinated tap water in Bangkok <i>Wanee R. Kusamran and Anong Tepsuwan</i>
P XVII B.20	Effects of <i>Alpinia oxyphylla</i> (zingiberaceae) on apoptosis in human promyelocytic leukemia (HL-60) cells and tumor promoter-induced inflammation in mice <i>Eunyoung Lee, Jong-Min Lee, Kwang-Kyun Park, Sang-Sup Lee and Young-Joon Surh</i>
P XVII B.21	DNA strand scission and cell death induced by salsolinol through redox cycling <i>Young-Joon Surh, Hyun-Jung Kim, Stacy Washington, In I. Chang and Young J. Oh</i>
P XVII B.22	DNA strand breaking activity and mutagenicity of a Maillard reaction product, 2,3-dihydro-3,5-dihydroxy-6-methyl-4h-pyran-4-one <i>Kazuyuki Hiramoto, Akiko Nasuhara, Kae Michikoshi, Tetsuta Kato and Kiyomi Kikugawa</i>
P XVII B.23	2-deoxy-D-glucose: A modifier of induced cytogenetic damage in culturedlymphocytes of patients with Fanconi anaemia and Down syndrome <i>K. Girijamani and P.M. Gopinath</i>
P XVII B.24	The inhibitory effects of moutan cortex and paeoniae radix on oxidative DNA damage by <i>t</i> -butylhydroquinone, phenolic antioxidant <i>Tomoko Okubo, Fumiko Nagai, Keiko Ushiyama, Takako Seto, Kanako Satoh and Itsu Kano</i>
P XVII B.25	Micronuclei in lymphocytes and exfoliated buccal cells of postmenopausal women with dietary changes in folate <i>Nina Titenko-Holland, Robert A. Jacob, Nong Shang, Anita Balaraman and Martyn T. Smith</i>
P XVII B.26	A study on the mechanism of antimutagenesis of Vitamin C <i>Zezhen Zhao, D.G. Wen, L.Z. Wei, H.Y. Zhi, Z.Y. Mou, X. Liu, M.S. Liu and H.L. Di</i>
P XVII B.27	Comparative studies on genotoxicity and antimutagenicity of natural and synthesized β -carotene stereoisomers <i>Kai-Xian Xue, Guo-Jian Ma, Jian-Zhong Wu, Sheng Yuan and Huai-Lan Qin</i>
P XVII B.28	In vivo apo-carotenol anticlastogenic activity <i>Larisa Tjurina, Andrey Durnev, Galina Volgareva, Nataliya Guseva, Andrey Oreshchenko and Sergei Seredenin</i>

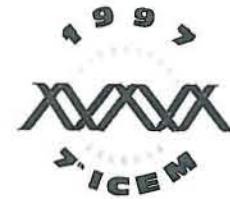

P XVII B.29	Inductive and suppressive effects of crude lemongrass on phase II xenobiotic-metabolizing enzymes <i>Usanee Vinitketkumnuen and Nirush Lertprasertsuk</i>
P XVII B.30	Antimutagenic prophylaxis of occupational risk groups <i>Alexander Vaglenov, Ekaterina Yaneva, Stoyan Laltchev, Maria Nosko, Vera Petkova, Sonya Pavlova, Katia Doneva, Maria Demirova and Dimitar Kehajov</i>
P XVII B.31	<i>In vivo</i> and <i>in vitro</i> cytogenetic analysis of the possible radioprotection effect of the amino acid glutamine <i>Denise Crispim Tavares and Catarina Satie Takahashi</i>
P XVII B.32	Phenolic and polyphenolic compounds in medicinal plants as antimutagens <i>Saroj Bala, I.S. Grover and Satwinderjeet Kaur</i>
P XVII B.33	Antimutagenicity of tea polyphenols (TP) on organic extracts of airborne particles <i>Liming Qian, Xianqiang Yang, Biqun Yang, Xiaoyun Xu, Hui Chen, Liming Xuan, Jianwen He and Jianheng Chen</i>
P XVII B.34	The inhibitory effects of Moutan Cortex and Paeoniae on Radix on oxidative DNA damage by t-butylhydroquinone, phenolic antioxidant <i>Tomoko Okubo, Fumiko Nagai, Keiko Ushiyama, Takako Seto, Kanako Satoh and Itsu Kano</i>
P XVII B.35	Detection of bioantimutagens with <i>E. coli</i> K12 and <i>S. cerevisiae</i> assay systems <i>Jelena Knezevic-Vukcevic, Branka Vukovic-Gacic, Dragana Mitic, Giorgio Bronzetti and Draga Simic</i>
P XVII B.36	Chemopreventive effects of Thai medicinal plants on formation of azoxymethane-induced DNA adducts and aberrant crypt foci in the rat colon <i>Takemi Kinouchi, Ratchada Suaeyun, Teera Chewonarin, Yaowarat Intiyot, Hideki Arimochi, Keiko Kataoka, Shigeru Akimoto, Usanee Vinitketkumnuen and Yoshinari Ohnishi</i>
P XVII B.37	Mutagen-modifying effects of beta-carotene <i>in vivo</i> <i>Andrey Durnev, Larisa Tjurina, Nataliya Guseva, Andrey Oreshchenko and Sergei Seredenin</i>
P XVII B.38	Antigenotoxicity of coffee in somatic cells of <i>Drosophila melanogaster</i> <i>Ulrich Graf and Suresh K. Abraham</i>
P XVII B.39	Why dose catechins inhibit the mutagenesis? <i>Hideyuki Furukawa and Junko Ebata</i>
P XVII B.40	Anticlastogenesis in cells of patients from the groups of genetic risk <i>Rouben Arutyunyan and Tamara Sarkisian</i>
P XVII B.41	Experiment designing for rapid assessment of the role of an antimutagen <i>Zezhen Zhao, D.G. Wen, L.Z. Wei and H.Y. Zhi</i>
P XVII B.42	Beta-glucans as antimutagens <i>Darina Chorvatovicova, Jozef Sandula and Eva Machova</i>
P XVII B.43	Effects of citrus fruits on the mutagenicity of 1-methyl-1,2,3,4-tetrahydro-β-carboline-3 carboxylic acid treated with nitrite in the presence of ethanol <i>Minoru Higashimoto, Hirokuni Yamato, Takemi Kinouchi and Yoshinari Ohnishi</i>
P XVII B.44	Antimutagenic activity of <i>Salvia officinalis</i> extracts against UV induced mutations in <i>E. coli</i> strains <i>Metka Filipic and Dea Baricevic</i>

P XVII B.45

Prevention of oxidative DNA damage by Brussels sprouts in rats
Xin-sheng Deng, Jingsheng Tou, Henrik E. Poulsen and Steffen Loft

P XVII B.46

Antimutagenic effects of centchroman- a contraceptive and a candidate drug for breast cancer in multiple test systems
A.K. Giri and G. Sengupta
